Nursing Program - ReNEW Curriculum
Division of Health Sciences and Wellness

Student Handbook Policies and Procedures

Laramie County Community College
Updated January, 2024

Accreditation Statement

This program has received full approval as a nursing education program by the following accrediting agencies and national standards boards:

Wyoming State Board of Nursing
130 Hobbs Avenue, Suite B
Cheyenne, WY 82002
(307) 777-7601

Accreditation Commission for Education in Nursing
(Formerly NLNAC, National League for Nursing Accrediting Commission, INC.)
(ACEN) (2011)
3343 Peachtree Road, NE Suite 850
Atlanta, GA 30326
P: 404-975-5000
F: 202-975-5020
www.ACENursing.org

Nondiscrimination Statement

Laramie County Community College is committed to providing a safe and nondiscriminatory educational and employment environment. The college does not discriminate on the basis of race, color, national origin, sex, disability, religion, age, veteran status, political affiliation, sexual orientation or other status protected by law. Sexual harassment, including sexual violence, is a form of sex discrimination prohibited by Title IX of the Education Amendments of 1972. The college does not discriminate on the basis of sex in its educational, extracurricular, athletic or other programs or in the context of employment.

The College has a designated person to monitor compliance and to answer any questions regarding the college's non-discrimination policies. Please contact: Title IX and ADA Coordinator, Suite 205, Clay Pathfinder Building, 1400 E. College Drive, Cheyenne, WY 82007, 307.778.1144, NDS@lccc.wy.edu.

Overview

The first part of this handbook addresses the LCCC Nursing Program and the School of Health Science and Wellness Admission Performance Standards and Policies and Procedures which apply to applicants interested in applying to the nursing program and all nursing students admitted to the nursing program.

The second part welcomes nursing students and provides an overview of the nursing program. Part three addresses the LCCC Nursing Program Policies and Procedures for the ReNEW Curriculum. Part four addresses clinical expectations, policies and procedures.

Applicants and nursing students are responsible for reading and understanding the material in this handbook.

Each student admitted to the nursing program will sign an acknowledgement stating understanding of and compliance with material contained in this handbook.

Part 1: Admission Performance Standards & Policies
(admission process)

Are you Ready to be a Nurse?

The nursing faculty of Laramie County Community College (LCCC) extends a warm welcome to you. Our desire is to assist you in your goal to become a professional registered nurse. This section of the handbook is compiled to serve as a resource for you during the application process.

LCCC is an open admission institution and provides programs beneficial to all students. LCCC admission requirements are found in the LCCC college catalog. Admission to the nursing program is competitive and students must be in satisfactory academic standing with a minimum cumulative GPA of 2.5.

The ReNEW nursing program at LCCC is a leveled educational program. This type of program provides students three avenues of recognition in the nursing profession: The Licensed Practical Nurse certification (LPN); Associate degree in Nursing (ADN), RN certification; and the Bachelor of Science in Nursing degree (BSN), RN certification.

Students enrolled in LCCC's ReNEW nursing program are automatically eligible for dual enrollment in the University of Wyoming's ReNEW nursing program to pursue their bachelor's in nursing, (BSN). The long-term benefit of the ReNEW curriculum is the ability for ADN graduates to move seamlessly toward their baccalaureate degree through online classes in as little as two additional semesters.

Student Commitment & Expectations

Although the nursing program is 10 credits per course, the time commitment rivals a 16-18 credit semester class load. Due to the demands of the nursing program, employment and college courses other than nursing courses will be challenging to maintain. Nursing faculty are committed to your success in the program and strongly encourage students to adjust so that essential learning is not compromised. Students are not excused from class or clinical assignments for personal schedules, work schedules, or elective classes.

Expectations

- Students are required to have their own laptop or tablet for taking tests in the nursing program, and for in classroom activities. Google Chrome is not supported and cannot be used for taking exams/assessments.
- Classroom attendance is mandatory and accountability for knowledge and assignments is the student's responsibility.
- Clinical learning experiences may be scheduled as early as 6 a.m. or as late at midnight, including weekends.
- Clinical sites are held in a variety of communities and students may need to commute. Transportation is not provided.
- Skills lab learning experiences require mandatory attendance. In these learning experiences, students are required to demonstrate competency. These experiences are a required part of the program.
- Students are required to participate in ALL learning experiences including clinical, lab, classroom experiences as they are scheduled. Students are not permitted to change schedules, trade shifts, move groups, or otherwise disrupt the schedule as it is written without program director/faculty approval. Decisions regarding changes will be evaluated on a case-by-case basis.
- Childcare arrangements, family obligations, work schedules, transportation, and lodging arrangements are the responsibility of the student.
- Failure to comply with attendance expectations or assignments could result in disciplinary action and/or dismissal from the nursing program.

(Revised 1.2024)

Essential Functions of a Nurse

Review the essential functions of a nurse (below) to ensure you meet the requirements of the nursing profession.

LCCC Nursing Program Technical Standards – Essential Functions of a Nurse

- Lift 10-25 lbs. Frequently
- Lift 26-50 lbs. Occasionally
- Carry 10-25 lbs. Occasionally
- Push/Pull up to 50 lbs. Occasionally
- Squat/Kneel Occasionally
- Wrist Pronation/Supination Constantly
- Wrist Flexion/Extension Constantly
- Sit Occasionally
- Stand/Walk Constantly
- Crawl Infrequently
- Back Flexion Constantly
- Back Extension Occasionally
- Back Rotation Constantly
- Neck Flexion Constantly
- Neck Extension Occasionally
- Neck Rotation Frequently
- Reaching Above Shoulder Frequently
- Use of Fingers and Hands Constantly
- Repeated Bending and Reaching Frequently
- Ability for Rapid Mental & Muscular Coordination Simultaneously Constantly
- Near Vision Required
- Hearing (aid permitted)

All nursing students admitted to Laramie County Community College Nursing Program must be able to meet the standards with or without accommodation(s).

Observation/Sensory-motor: Students must be able to observe demonstrations and learn from experiences in the basic sciences, including but not limited to, anatomy, physiology and microbiology laboratory situations. Students must be able to observe and learn from experiences in the clinical nursing laboratory such as the following examples: accurately read gradients/calibrations on a syringe; measure medications accurately; accurately recognize color changes on chemical reaction strips; assess heart, breath, abdominal sounds; assess normal and abnormal color changes in the skin; observe pupil changes; and observe digital or waveform readings.

Communication: Communications include not only speech but also reading, writing and computer usage, including handheld digital access. Students must be able to communicate accurately and effectively with patients, caregivers, physicians, other health professionals, clinical facility staff, faculty and staff, peers, and the community in general in order to elicit information, describe changes in mood, activity and posture, and perceive nonverbal communications.

Psychomotor: Students should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion, and other diagnostic maneuvers. Students should be physically able to collect specimens and perform basic tests (such as glucose finger stick, urine dipstick). Students should be able to execute motor movements reasonably required to provide general care and emergency treatment to patients. Example of emergency treatment reasonably required of nurses are cardiopulmonary resuscitation (CPR), administration of intravenous (IV) medication, application of pressure to stop bleeding, and assist in moving and lifting patients using proper body mechanics. Such actions require coordination of both gross and fine muscular movements, equilibrium and using tactile and visual senses.

Intellectual-Conceptual, Integrative, and Quantitative: Students must be able to comprehend and interpret documents written in English. Students should have cognitive abilities including measurements, calculation, reasoning, analysis, and synthesis. Critical thinking is the ability to synthesize knowledge and integrate the relevant aspects of a client's history, physical exam findings and diagnostic studies. Problem solving, the critical skill demanded of nurses, requires all of these intellectual abilities. In addition, the student should be able to comprehend three dimensional relationships and to understand the spatial relationships of structures in order to understand normal and abnormal anatomy and physiology.

Behavioral and Social Attributes: Students must possess the emotional health required to utilize their intellectual abilities fully, exercise good judgment, complete all responsibilities attendant to the nursing diagnosis and care of patients promptly, and the development of mature, sensitive and effective relationships with patients and their families. Students must be able to tolerate physically taxing workloads and to function effectively under stress. They must be able to adapt to changing environments, to display flexibility, and to learn to function in the face of uncertainties inherent in the clinical problems of many patients. Compassion, integrity, concern for others, interpersonal communication skills, interest and motivation are all personal qualities that should be assessed during the education process. As a component of nursing education, a student must demonstrate ethical behavior including adherence to the professional nursing code and the LCCC and LCCC Nursing Program student conduct codes. These standards were adapted from the University of Kansas School of Nursing Technical Standards for Admission.

Financial Commitment

Review the approximated breakdown of costs (next section) for a better understanding of the financial commitment needed to complete the ADN degree. Alternative funding may be found by contacting the Financial Aid Office at 307-778-1215.

Approximated Breakdown of Program Costs

Approximate Pre-Entrance Costs	Est. Costs
Background Check, Drug Screen and Compliance Tracker (CastleBranch)	$209
BLS CPR Certification (American Heart Association)	$55
Physical Exam	Varies
Immunizations, Titers, and Flu/COVID 19 Vaccines	Varies
Laptop or tablet (NOT Google Chrome)	Varies
TOTAL	$264+

UNIFORMS/EQUIPMENT	Est. Cost
2 Uniforms (top and pants) *	$140
Scrub Jacket (Optional) *	$ 32
Shoes	$ 70
Stethoscope *	$ 80-150
Watch with a second hand *	$ 30
Penlight *	$ 10
Bandage Scissors *	$ 10
TOTAL	$362-432
Items available in LCCC Bookstore for purchase or to acquire using financial aid award.	

First Year: TUITION/FEES/BOOKS	Est. Cost
Program & Course lab fees	$ 1,000
College Tuition & fees (in-State)	$ 3,426
Books	$ 1,200
E-Learning/Testing Platform (ATI) (Fall Semester)	$ 650
E-Learning/Testing Platform (ATI) (Spring Semester)	$ 650
TOTAL	$ 6,926

Second Year: TUITION/FEES/BOOKS	Est. Cost
Program & Course lab fees	$1,000
College Tuition & fees (in-State)	$ 3,426
Books *(advanced placement students will have book costs).*	$0
E-Learning/Testing Platform (ATI) (Fall Semester)	$ 650
E-Learning/Testing Platform (ATI) (Spring Semester)	$ 650
TOTAL	$5,726

(Updated 6/2023)

Student Employment

Due to the demands of the fulltime nursing program, student employment should be approached with caution. It is the desire of the nursing faculty that students be successful in this program and that essential learning not be compromised. Student education is the primary concern of the faculty; therefore, the student will have a variety of learning experiences including but not limited to early morning, afternoon, evening and weekend. Students will not be excused from class or clinical assignments for personal, family, or work schedules. An alternative to working may be found by contacting the Financial Aid Office at LCCC.

LCCC assumes no responsibility for nursing students in healthcare positions. Students in an employment setting have a personal and professional responsibility to engage in only those activities which fall within the job description for nonprofessional workers and should refuse to participate in activities that the student has not been legally licensed to perform. If a student nurse is employed in a health care setting, a different uniform other than the school uniform must be

worn. A student in the LCCC program cannot be employed in the capacity of registered nurse or student nurse and will be responsible only to the hiring agency while working as an employee.

Program of Study
General Education courses required for graduation from the Nursing Program must be completed with a 2.5 GPA or better. All nursing courses must be completed with at least a 75% average weighted grade for unit and final exams or better (calculation outlined in part 3).

Academic Progression in the Nursing Program
In order to remain and progress in the nursing program, students are expected to:
- Maintain acceptable background checks/drug screens throughout the nursing program, and during all program related activities.
- Maintain up to date clinical clearance documentation in document storage system as directed.
- Maintain the LCCC, HSW, and Nursing Program standards of student conduct.
- Achieve a "C" or better in all courses required to complete the Associate Degree in Nursing (ADN) in the order listed in the nursing program student handbook.
- Achieve at least a 75% average or better on the clinical evaluation tool in all nursing courses.
- Achieve at least a 75% average weighted grade for all unit and final exams.

Prerequisite course information:
- **STRT 1000:** Strategies for Success
  - See LCCC college catalog to see if you qualify for an exemption.
- **ENGL 1010**: English Composition I
- **MATH 1400**: College Algebra
  - Statistics, Theory of Mathematics or Clinical Calculations do not fulfill this requirement.
- **ZOO 2015**: Human Anatomy and Physiology requirement:
  - If you take Human Anatomy, you must complete the sequence with Human Physiology.
  - If you take A&P I, you must complete the sequence with A&P II
  - Taking one course from each sequence will **not** fulfill the requirements.

If the general education courses are not completed prior to admission to the nursing program, they must be completed concurrently in the semester they are indicated below. Students who do not successfully complete the core nursing courses and general education course(s) in the sequence indicated below are not able to progress to the next semester in the nursing program.

Program of Study: ReNEW Curriculum

Prerequisites:	Credit Hours	Clock Hours
STRT 1000: Strategies for Success	3	45
ENGL 1010: English Composition I	3	45
MATH 1400: College Algebra	3	45
ZOO 2015: Human Anatomy or Anatomy & Physiology I	4	75
Semester Total	**13**	**210**

Program Total:	**70**	**1695**

Admission Process

1. There are two primary avenues for acceptance into the nursing program, general nursing cohort or advanced placement cohort. The general nursing cohort is for applicants needing all 4 semesters of the nursing program in order to qualify to take the National Licensure Exam (NCLEX-RN). Advanced placement applicants must have prior education sufficient to qualify to begin the nursing program in the third semester. Advanced placement requires that the student is prepared and licensed as a Licensed Practical Nurse (LPN), students previously accepted within the LCCC nursing program seeking reentry, applicants from another nursing program within the ReNEW Consortium seeking transfer. Please note, transfer credit is limited to nursing courses completed at an ACEN, CNEA, or CCNE approved program. Each transfer or re-entry student will be evaluated to determine the student's best option for success regarding entry points into the program.
2. Students are welcome to apply to the LCCC Nursing Program while enrolled in any of the required pre-requisite/co-requisite courses. Through this process, students may have enough completed credits to be competitive for consideration to be accepted conditionally. However, completion of the four pre-requisites with a "C" or better is required prior to granting of full admission to the nursing program.
3. A Cumulative GPA of 2.5 or higher is required in all of the completed courses listed in the nursing curriculum. **ONLY** official transcripts processed through LCCC are accepted for consideration. Unofficial transcripts are not accepted.
4. AP, IB, and/or CLEP credits are considered for course requirements. Students must list how credits were obtained and scores for any proficiency testing completed.

All applicants can be considered for either fall or spring semester admissions. For fall semester start, applications are generally accepted February 1-28. For spring semester start, applications are accepted July 1-31.

General Nursing Cohort Admission requirements:

The online application will only be considered if all of the following conditions are met by closing date of the online application period.
1. Average Cumulative GPA of 2.5 or higher:
    - **ONLY** official transcripts processed through LCCC are accepted for consideration.
    - A Cumulative GPA of 2.5 or higher is required in all of the completed courses listed in the nursing curriculum. **ONLY** official transcripts processed through LCCC are accepted for consideration. Unofficial transcripts are not accepted.
    - AP, IB, and/or CLEP credits are considered for course requirements. Students must list how credits were obtained and scores for any proficiency testing completed.
2. ATI TEAS Entrance Assessment:
    - Overall score to the exact decimal point. Currently the mean scores are: 64.9 or higher and the reading section is currently at least 72.9. Mean scores are subject to change as disseminated by ATI, please confirm with LCCC Exam Lab for questions regarding most current mean scores. Contact the LCCC testing center for details, updated national mean scores, and scheduling at 307-778-1274 or examlab@lccc.wy.edu.
    - The TEAS assessment is a multiple-choice standardized assessment of basic knowledge in reading, math, science, English, and language usage. Studies show a consistent link between a student's performance on the TEAS and future academic success. There are 170 multiple-choice questions, and the time limit is 3 hours and 29 minutes.
    - The TEAS assessment can be taken up to 2 (two) times in one calendar year. If the student fails to achieve the required level of proficiency on the 2nd attempt, the student must wait one year from the date of the second test to test again.
3. Prerequisite courses completed with a minimum "C" grade:
    - STRT 1000: Strategies for Success (3 credits)
        - Some students may qualify for an exemption to this course. See course catalog for more information.
    - ENGL 1010: English Composition I (3 credits)
    - MATH 1400: College Algebra (3 credits)
        - Statistics, Theory of Mathematics or Clinical Calculations does not fulfill this requirement.
    - ZOO 2015: Human Anatomy or Anatomy & Physiology I (4 credits)
        - If you take Human Anatomy you must complete the sequence with Human Physiology.
        - If you take A&P I you must complete the sequence with A&P II
        - Taking one course from each sequence will not fulfill the requirements.
4. Submit a degree seeking LCCC admission application.
    - Submit this application to LCCC at least 2-3 weeks prior to the nursing application deadline in order to ensure it is processed before the online nursing application deadline.
5. Official transcripts received and processed through LCCC.

- Send official transcripts, as applicable, to LCCC at least 2-3 weeks prior to the nursing application deadline in order to ensure it is processed before the online nursing application deadline.
- Applicants to the general nursing cohort who have failed nursing course(s) in another program may be considered for admission to LCCC ADN nursing program. However, this admission will be considered the applicants final admission. Failure to complete courses successfully may result in dismissal an inability to be re-admitted to LCCC's ADN nursing program.

6. Meet via phone or in-person with a Nursing Program Student Success Coach.
- Once the application to LCCC is submitted and the transcripts are processed, if you have not previously talked with the Nursing Program Student Success Coach, schedule an appointment.
- Call 307-778-1212 to make an appointment.

Advanced Placement Cohorts

(Students qualified to join the nursing program at the beginning of the second year/third semester)

LPN to RN Completion Admission requirements:
The online application will only be considered if all of the following conditions are met by closing date of the online application period
1. Applicants must have an active unencumbered license as a Licensed Practical Nurse (LPN).
2. Meet the admission requirements for the General Nursing Cohort (steps 1-6 above).
3. Transfer courses must be completed at a "C" or higher.
    - Applicants to the advanced placement cohort who have failed nursing course(s) in another program may be considered for admission to LCCC ADN nursing program. However, students must disclose their previous nursing school/course experiences upon application, provide contact information for Program Director/Dean of previous program, AND written consent to contact program for any additional information needed. Students applying for advanced placement for LPN to RN completion may have previously been accepted within the LCCC nursing program seeking reentry, or applicants from another nursing program within the ReNEW Consortium seeking transfer. Please note, transfer credit is limited to nursing courses completed at an ACEN, CNEA, or CCNE approved programs. Each transfer/advanced placement student will be evaluated to determine the student's best option for success regarding entry points into the program.
    - If the student fails to disclose previous nursing school/course experiences with application, upon discovery, the student's application will be rejected. If student is accepted and failure to disclose previous experiences are discovered student's admission will be rescinded, and the student will not continue with the nursing program.
    - Upon successful admission to the nursing program, this admission will be considered the applicant's final admission. Failure to complete courses successfully upon this admission will result in dismissal an inability to be re-admitted to LCCC's ADN nursing program.
4. Successful completion of all prerequisite courses and ZOO 2025 Human Physiology or Anatomy & Physiology II; PSYC 1000 General Psychology; MOLB 2240 Medical Microbiology with a "C" or better.
5. Take the PN Comprehensive Predictor Test: Composite percentage score must be equal to or better than the National Mean.
    - If student has completed the NCLEX-PN state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.
6. Students may be required to complete the Clinical Skills Check-off, to demonstrate proficiency in previously acquired skills.
7. Advanced placement is dependent upon space available and adequate clinical resources and not guaranteed.
8. If admitted to the nursing program: complete all remaining courses required for the ADN with a grade of "C" or higher prior to graduation from the program including CO/M 2010 Public Speaking and the WY statutory requirement.

Transfer Student from another nursing program admission requirements:
1. The online application will only be considered if all of the following conditions are met by closing date of the online application period.1. Meet the admission requirements for the general nursing cohort (steps 1-6).
2. Transfer courses must be completed at a "C" or higher.
    - Applicants to the advanced placement cohort who have failed nursing course(s) in another program may be considered for admission to LCCC ADN nursing program. However, students must disclose their previous nursing school/course experiences upon application, provide contact information for Program Director/Dean of previous program, AND written consent to contact program for any additional information needed. Students applying for advanced placement may have previously been accepted within the LCCC nursing program seeking reentry, or applicants from another nursing program within the ReNEW Consortium seeking transfer. Please note, transfer credit is limited to nursing courses completed at an ACEN, CNEA, or CCNE approved programs. Each transfer/advanced placement student will be evaluated to determine the student's best option for success regarding entry points into the program.
    - If the student fails to disclose previous nursing school/course experiences with application, upon discovery, the student's application will be rejected. If student is accepted and failure to disclose previous experiences are discovered student's admission will be rescinded, and the student will not continue with the nursing program.
    - Upon successful admission to the nursing program, this admission will be considered the applicant's final admission. Failure to complete courses successfully upon this admission will result in dismissal an inability to be re-admitted to LCCC's ADN nursing program.

3. Take the PN Comprehensive Predictor Test: Composite percentage score must be equal to or better than the National Mean.
   - If student has completed the NCLEX-PN state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.
4. Students may be required to complete the Clinical Skills Check-off, to demonstrate proficiency in previously acquired skills.
5. Nursing courses considered for transfer must be completed within the last one semester (excluding summer).
6. Transfer credit is limited to nursing courses completed at an ACEN, CNEA, or CCNE approved program.
7. Applicants who have failed more than 1 nursing course are ineligible for transfer.
8. The transfer applicant must provide a course description and complete syllabus for each nursing course completed. The nursing admission committee will review syllabi and compare content. Placement in the program is dependent upon comparable knowledge and skills between programs.
9. The transfer applicant may be required to complete remedial coursework as necessary.
10. Advanced placement is dependent upon space available and adequate clinical resources and is not guaranteed.

Submitting the Online Nursing Application: ALL Applicants

1. Submit the online nursing application during the open application period:
   - Fall semester start, applications are generally accepted February 1-28.
   - Spring semester start, applications are generally accepted the prior fall - July 1-31.
2. Go to lccc.wy.edu/pathways/HealthSciencesWellness/nursingProgram.apply.aspx during the open application period to submit the online nursing application.
3. The application cannot be saved before submission. You may review the application content, exit, and return to complete it without penalty.
4. **General Nursing Cohort Applicants**, submit the following required information for the online application:
   - Personal information (name, address phone number, LCCC student ID, etc.).
   - Completed Course Worksheet – complete and upload.
   - ATI TEAS assessment information - Enter the date and location where TEAS assessment was taken and upload TEAS assessment scores for the overall score and reading score. Applications submitted without the official results of the TEAS test will not be considered.
   - Agreement to begin the immunization process and to schedule the physical exam while waiting for notification of acceptance status for the nursing program.
5. **Advanced Placement Cohort Applicants**: submit the following required information for the online application:
   - All the requirements under the General Nursing Cohort Applicants (i-iv).
   - Date of completion for the PN Comprehensive Predictor and overall score.
     - If student has completed the NCLEX-PN state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.
   - Complete previous nursing education section indicating demonstrating completion of 2 semesters of nursing education with the following conditions. Students applying for advanced placement may have previously been accepted within the LCCC nursing program seeking reentry, or applicants from another nursing program within the ReNEW Consortium seeking transfer. Please note, transfer credit is limited to nursing courses completed at an ACEN, CNEA, or CCNE approved programs. Each transfer/advanced placement student will be evaluated to determine the student's best option for success regarding entry points into the program. Students must indicate if they have ever been ineligible to continue in a nursing program. Failure to disclose failure/ineligibility may disqualify student from acceptance into the nursing program. Each transfer or re-entry student will be evaluated to determine the student's best option for success regarding entry points into the program.
6. Submit all application materials by **5 p.m. on the final day** of the application period.
7. All applicants will be notified of their acceptance status by the last day of the current semester when space availability is determined for the program.

Name: _____

Course Worksheet

Students are welcome to apply to the LCCC Nursing Program while enrolled in any of the required pre-requisite/co-requisite courses. Students may have enough completed courses to be considered for acceptance. Please note, the four pre-requisite courses must be completed successfully, "C" or better, prior to beginning the program in order to achieve full acceptance. AP, IB, and/or CLEP credits are considered for course requirements. Students must list how credits were obtained and scores for any proficiency testing completed.

Applicants are required to upload this completed worksheet as part of the online application process. All items must be filled in for consideration or application will be considered incomplete.

Course	# of Attempts	Course Name	Institution	Semester completed or taking (ie. Fa21, Sp23, Su25)	Letter Grade -OR- AP/IB/CLEP Score

HOEC 1140-Nutrition					
Human Culture Elective *Human Culture Elective choices: ANTH 1200, ART 1010, COMM 1000, ECON 1000, ENGL 2020, EOG 1000, HUMN 1010, HUMN 1020, MUSC 2024, SOC 1000, SPAN 1010, THEA 1000*					
CHEM 1000- Introductory Chemistry					
STAT2050 or 2070- Statistics (not within the HSW degree, will not be covered by financial aid)					

The Nursing Department will conduct a FINAL EVALUATION of your coursework by comparing this worksheet to your Official Transcripts.

Students will receive credit for completed coursework through verification of OFFICIAL Transcripts only.

Candidate Selection Process

There are 2 phases to the selection process: (1) Application Evaluation and Scoring (2) Post-Selection Requirements.

Phase I: Application Evaluation
Applicants are evaluated for admission by the nursing program using **required course elements**.

Required Elements for all applicants (general nursing cohort and advance placement cohort):
1. Cumulative Average GPA of 2.5 or higher:
   - ONLY official transcripts processed through LCCC are accepted for consideration.
   - A Cumulative GPA of 2.5 or higher is required in all of the completed courses listed in the nursing curriculum. **ONLY** official transcripts processed through LCCC are accepted for consideration. Unofficial transcripts are not accepted.
   - AP, IB, and/or CLEP credits are considered for course requirements. Students must list how credits were obtained and scores for any proficiency testing completed.
   - Students are welcome to apply to the LCCC Nursing Program while enrolled in any of the required pre-requisite/co-requisite courses. Students may have enough completed courses to be considered for acceptance. Please note, the four pre-requisite courses must be completed successfully, "C" or better, **PRIOR** to beginning the program in order to achieve full acceptance.

2. General nursing cohort only: ATI TEAS Entrance Assessment
   - Overall score to the exact decimal point required. Currently the mean scores are: 64.9 or higher and the reading section is currently at least 72.9. Mean scores are subject to change as disseminated by ATI, please confirm with LCCC Exam Lab for questions regarding most current mean scores at 307-778-1274 or examlab@lccc.wy.edu
   - The TEAS assessment can be taken up to 2 (two) times in one calendar year. If the student fails to achieve the required level of proficiency on the 2nd attempt, the student must wait one year from the date of the second test to test again.

3. Advanced Placement Applicants:
   - Successfully complete all prerequisite courses and ZOO 2025 Human Physiology or Anatomy & Physiology II; PSYC 1000 General Psychology; MOLB 2240 Medical Microbiology with a "C" or better.
   - Take the PN Comprehensive Predictor Test: Composite percentage score must be equal to or better than the National Mean.
     - If student has completed the PN-CLEX state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.

4. Conditionally Accepted Applicants:
   - In the unlikely event that a student is accepted into the nursing program without meeting each required benchmark, the student acknowledges additional steps will be required to maintain acceptance and progression in the program. These additional steps include but are not limited to:
     - Additional faculty coaching (i.e. 1:1 sessions, group study, tutoring, etc. as assigned by the faculty coach within the nursing department).
     - Additional course work / electronic platform training / skills practice and demonstration that may be required to be successful in the rigor of the nursing program.

Course evaluation for all applicants:

1. Prerequisite Courses with a minimum "C" grade (eligibility varies depending on grade earned)
   - Refer to the Admission requirements for **General Nursing Cohort** or the Program of Study and Progression in the Nursing Program Chart for a list of the prerequisite/co-requisite courses and information.
   - Refer to the **Course Worksheet** to determine admission eligibility. As applicable AP, IB, and/or CLEP credits are considered for course requirements. Students must list how credits were obtained and scores for any proficiency testing completed.
2. Required courses in the LCCC ADN Nursing Program and Required courses in the UW ReNEW BSN Nursing Program
   - Refer to the Course Worksheet and your Student Success Coach for courses and to determine potential eligibility for admission to the nursing program.

Completing only the prerequisite courses with the minimum "C" requirement typically will not provide an applicant with enough completed coursework to be competitive for consideration for admission to the nursing program. Most applicants accepted into the nursing program have completed the pre-requisite courses AND a majority of the required courses in the LCCC ADN Nursing Program with an average grade of "B" or higher.

Applications are reviewed by the application committee after the submission deadline. Applications that are incomplete, not submitted online through the application portal on the nursing program's website or submitted past the application deadline will not be considered. There is no limit on the number of times an applicant may apply.

Phase II: Post-Selection Requirements:

Applicants offered placement in the nursing program (and accepting placement) must meet the following requirements by deadlines addressed in the acceptance letter. Full admission is contingent upon completion of **ALL** the requirements listed below. Failure to complete requirements by deadlines may result in rescinding the admission offer.

- Sign and return Acceptance Reply Form by deadline indicated in the acceptance letter.

- ALL STUDENTS, new and returning must attend a **mandatory** orientation session.

- Register for nursing program classes by the deadline.

- Complete CPR Certification: Basic Life Support for the Health Care Provider (BLS) from the **American Heart Association only**. Classes must be taken in December for spring semester start or June for the fall semester start, no exceptions are permitted.

- As directed, complete **Background Check** & **Drug Screen** process in document storage system.

  o An acceptable report of the Background Check/Drug Screen is required for clinical education. This is mandatory for enrollment in the nursing program and participation in nursing program related activities. Applicants who have been convicted of a felony, treated for mental illness or substance abuse should follow the instructions form the Dean's office of Health Science and Wellness as well as the Wyoming State Board of Nursing.

  o Note: LCCC will provide education for those who meet the program objectives and have an acceptable background check and drug screen, but the Wyoming State Board of Nursing must protect the public and can deny licensure regardless of the Nursing program's background check. The Wyoming State Board of Nursing will perform a background check on all candidates for licensure. Their determination may prevent a graduate from obtaining licensure. Review the state licensure requirements at http://www.nursing-online.state.wy.us for any questions or concerns. Students are advised that the inability to gain clinical education experiences can result in the inability to meet program objectives and outcomes. These circumstances may prevent acceptance into and/or continuance in the program.

- **Download, sign, date, and upload** the documents below. It is the student's' responsibility to make sure all uploaded documents are "cleared" in document storage system as directed.

  1. Code of Conduct – Responsibility and Civility Contract LCCC Nursing Program.

  2. Student Confidentiality and Responsibility.

  3. Voluntary Assumption of Risk and Release of Liability.

  4. Consent for Release of Program Information.

  5. Compliance of Policies.

  6. Substance Abuse Policy/Consent to Testing.

  7. Patient Simulation Lab – Confidentiality Statement/Photography Release.

  8. CHESS Test: Sign the form acknowledging you have read and completed the exam and upload the signature sheet only.

  9. Physical Examination Form (may be uploaded several times under each immunization).

  10. Proof of mandatory immunizations including Influenza (seasonal) and COVID-19 vaccination.

11. Proof of CPR Certification – both sides of card.

12. Health Insurance: All students admitted to the nursing program are expected to carry their own personal health insurance or be responsible for personal health care costs. Students are not covered by Workers Compensation in the event that an injury is sustained at a clinical location.

Re-Admission Guidelines for LCCC Nursing Students Currently in the Nursing Program

Re-Admission Guidelines for students in good standing in the nursing program
This process is for students who withdrew from the nursing program but were in good standing at the time of withdrawing. Good standing includes but is not limited to: a grade of 75% average weighted grade on exams and clinical evaluation tool at the time withdrawal is being considered. Students on a performance improvement plan may not be considered. The first step is to meet with the course faculty and make them aware of the situation and that the student is considering withdrawing from the program. The next step is to meet with the program director for nursing. Re-admission is based on recommendation of the nursing faculty, space availability and, with limited exception, will count towards the one-time re-entry policy.

> Students who step out of the program in good standing will need to apply through the online nursing application by the deadline of the open application period in order to be considered (February 1-28 and July 1-31).

Note** Students stepping out of the semester related to medical emergencies, pregnancy, adoption, death in the family, military leave, or other disability-related factors will be reviewed on a case-by-case basis. It is the responsibility of the student to communicate with the faculty of the course AND the program director as promptly as is possible to determine appropriate next steps including re-entry to the nursing program. Please see Absence Considerations During Nursing Program for additional information.

Students petitioning to retake a semester due to a failing grade (includes all semesters):
Nursing students interested in pursuing the option to retake **any semester courses (including restarting the program)** need to meet with the program director of nursing and faculty review committee as scheduled prior to the end of the semester in order to be eligible for consideration. During the meeting students are required to address:
- Factors that contributed to the unsuccessful completion of the course.
- Identify a plan to ensure successful completion on the second attempt, including SMART Goals, if the petition to retake the semester is granted.
- Program director of nursing and faculty will discuss available options and recommendations for petitioning to retake a semester.
- After the meeting, the program director of nursing and Faculty will provide student with the re-admission application form by LCCC student email.
- The Re-Admission Application form must be submitted during the online open application periods generally offered February 1-28 or July 1-31. Please note, the Re-Admission Application form replaces the course worksheet form. Each re-entry student will be evaluated to determine the student's best option for success regarding entry points into the program.
- Students are notified of the decision for retaking a semester at the end of the semester prior to when they would be expecting to re-enter the nursing program.
- Students may remain out of the nursing program for one (1) semester only.
- Re-admission is based on recommendation of the program director, faculty review committee, and space availability. Re-admission will count towards the one-time re-entry policy. Students may enter the nursing program once and there is no guarantee of readmission. Program director and faculty members reserve the right to deny readmission based on a number of factors, including and not limited to:
  - Prior clinical and theory performance.
  - Interim remedial work completed by the student.
  - Failure to follow expectations for Professional behaviors as outlined in the Performance Improvement Plan for non-academic performance (i.e. attendance, safety, communication, etc.).
  - Failure to follow the expectations outlined in the Performance Improvement Plan for academic performance (i.e. meet with faculty for a test review after each unit exam, schedule at least 1 office appointment with faculty, etc., may be ineligible for consideration).

Re-Admission Application Process:

Applications may be submitted during the open application periods generally offered February 1-28 and July 1-31, submit the Re-Admission Application through this portal with the following inclusions:

- Complete the demographic information for the online application.
- **DO NOT** upload the course worksheet or the TEAS scores sheet. In place of the course worksheet - Upload the completed <u>Re-Admission Application</u> form and any other requested documentation into the Course Worksheet section of the application.
- For requests to re-take NURS 2300, and NURS 2400, students are required to take the **ATI PN-Comprehensive Predictor at their cost and score equal** to or better than the national mean in order to demonstrate current nursing knowledge expected at the beginning of the second-year level of the nursing program. Each re-entry student will be evaluated to determine the student's best option for success regarding entry points into the program.
  - If student has completed the NCLEX-PN state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.
- Readmission is not guaranteed and is based on:
  - Scores from the re-entry exam.
  - Completeness of the re-admission application.
  - Clinical capacity and adequate clinical resources.
  - Student's prior theory and clinical performance.
  - Reason for departure from the program.
  - Professional behaviors demonstrated while in the nursing program and/or interim remedial work completed by the student, satisfaction of any requirements outlined by the faculty review committee, if applicable, and individual circumstances. Students are notified by LCCC student email of the decision.

Re-Admission Guidelines for students failing a general education course while in the nursing program

Students taking general education/required co-requisite courses required for the LCCC ADN nursing degree while in the nursing program, must successfully complete these courses in sequence with the program of study in order to continue to the next semester. Failure to successfully complete a general education <u>courses in sequence</u> while in the nursing program will result in dismissal from the nursing program. Students will need to submit a Re-Admission Application after successfully completing the course (See How to submit the Re-Admission Application above). Re-Admission is not guaranteed. The student must meet the re-admission conditions for acceptance in order to be considered. See conditions for acceptance below.

Conditions for acceptance (all options):

- Students seeking re-entry for any semester are eligible to re-enter the nursing program once.
- Students may remain out of the nursing program for 1 semester only, unless approved by nursing program administration.
- Nursing program director and faculty recommendation for placement in the nursing course sequence is required.
- Students requesting placement into NURS 2300 or NURS 2400 are required to take the **ATI PN-Comprehensive Predictor at their cost and score equal** to or better than the national mean in order to demonstrate current nursing knowledge expected at the beginning of the second-year level of the nursing program. The PN-Comprehensive Predictor must be completed by the end of the application period in which the student is applying, and the official scores uploaded into the online application. The ATI PN-Comprehensive Predictor can be taken in the Exam lab at LCCC. Check with the LCCC Exam lab for pricing and dates available to take the exam/assessment.
  - If student has completed the NCLEX-PN state licensure examination successfully within 1 year of application, these results may be submitted in place of the PN Comprehensive Predictor Test Score.
- Students may be required to demonstrate proficiency in nursing skills learned up to the point of dismissal from the nursing program by completing the clinical skills check-off; in order to promote safe practice in the patient care clinical area.
- ALL students re-entering the nursing program will be required to complete a new drug test and a criminal background check.
- Students re-entering the nursing program are required to meet immunization, Tb screening, CPR and clinical record requirements according to policy.
- Students who do not take any LCCC courses for one semester will need to complete an application for admission to LCCC.

Re-Admission Guidelines for Military Deployment of LCCC Nursing Student:
Laramie County Community College appreciates the hardships military personnel, and their families face during periods of deployment. LCCC encourages service members to continue their education and assures them that LCCC will continue to be flexible and responsive to their needs. Active duty military students accepted into the LCCC ADN nursing program may have their space held without penalty from the point of deployment until their return. This space may be held for the amount of time served in support of service operations.

Placement in the program following the deployment period is based on the results of assessments that may be administered following extended absence.
- In order to maintain currency in nursing practice, the student may be required to repeat some nursing courses and demonstrate proficiency in skills learned.
- Whenever possible, program director of nursing and nursing faculty will identify placement assessments and parameters for reentry prior to deployment. Placement assessments are based on current courses and may change to reflect periodic curriculum updates.
- Depending on current course students may be required to take the PN Comprehensive Predictor Test: Composite percentage score must be equal to or better than the National Mean.
- Students may be required to complete the Clinical Skills Check-off, to demonstrate proficiency in previously acquired skills.

Laramie County Community College

WYOMING STATE BOARD OF NURSING: STATEMENT OF UNDERSTANDING CONCERNING LICENSURE

The following questions are asked on the State of Wyoming application for licensure as an LPN/RN; therefore, it is for your information and written answers are not required.

1. Has any disciplinary action been taken or is pending (i.e. open investigation) against you from a LICENSING AUTHORITY?

2. Have you ever been investigated or charged with ABUSE, NEGLECT OR MISAPPROPRIATION OF PROPERTY?

3. Has your application for examination or licensure ever been DENIED BY A LICENSING AUTHORITY?

4. Do you have a physical or mental disability which renders you unable to perform nursing services or duties with reasonable skill and safety and which may endanger the health and safety of persons under your care?

5. Are you now or have you in the past five (5) years been addicted to any controlled substance, a regular user of any controlled substance with or without a prescription, or habitually intemperate in the use of intoxicating liquor?

6. Have you been terminated or permitted to resign in lieu of termination from a nursing or other health care position because of your use of alcohol or use of any controlled substance, habit forming drug, prescription medication, or drugs having similar effects?

7. Have you ever been arrested, convicted, pled guilty to, pled nolo contendere to, received a deferment, or have charges pending against you for any crime including felonies, misdemeanors, municipal ordinances, and/or any military code of justice violations, including driving under the influence of any intoxicating substance? Do not include nonmoving traffic violations or moving violations which did not involve alcohol or substance impairment

If you answer 'yes' to any of the above, refer to www.lccc.wy.edu/programs/nursing, select "Apply to the Program" and Background check information (pdf). LCCC will provide education for those who meet our program requirements and have an acceptable background check/drug screen, but the Wyoming State Board of Nursing's role is to protect the public and it can deny licensure regardless of our program's background check/drug screens.

Clinical agencies may require drug screening, abuse clearances and/or criminal background checks prior to allowing students into a clinical setting. Students are advised that the inability to gain clinical educational experiences can result in the inability to meet program objectives and outcomes. The circumstances may prevent progression through the program and ultimately result in dismissal from the program.

I have read and understand the above statement regarding nursing licensure in Wyoming.

PRS 5324 11/1

Health Sciences and Wellness School Policies

1. **General Health Requirements:** Students must be able to fully and successfully participate in all program activities whether in the classroom, laboratory or clinical setting. This includes, but is not limited to, the capacity for sensory and motor functions that allow independent classroom/laboratory/clinical performance and routine and emergency client care. It is essential that students in many Health Sciences programs are able to perform a number of physical activities in the clinical portion of their program. For example, students may be required to physically assist and/or lift patients or equipment, stand for several hours at a time and perform bending activities. The clinical experience places students under considerable mental and emotional stress as they undertake responsibilities and duties impacting patient lives. Students must be able to demonstrate rational and appropriate behavior under stressful conditions. If a student believes that he or she cannot meet one or more of the standards without accommodations, the student must request an accommodation through the Office of Student Accommodation. Students should refer to their respective program policies for required essential skills and functional abilities.

   a. A student having a temporary medical condition that inhibits or prevents program participation must provide a physician's written explanation. Should a student become unable to participate partially or fully in the program's activities, the student may need to withdraw.
   b. Cheyenne campus and online: Students with a documented disability needing educational accommodations should contact the Office of Student Accommodation (OSA) each semester by stopping by the Clay Pathfinder Building PF 207, or by calling (307) 778-1359, or e-mailing aclubb@lccc.wy.edu or kyarborough@lccc.wy.edu. Albany County Campus: Students with a documented disability needing educational accommodations should contact OSA staff at (307) 772-4254.

Accommodations will be provided by instructors only with approval from the OSA.

2. **Health Physical Form:** A health physical form must be completed by a licensed/certified healthcare practitioner (M.D., D.O., N.P., and P.A.) and submitted according to the time specified by your Health Sciences program.

   a. The Program Director may require a new health form should any alteration in the student's health occur.

3. **Immunizations / Screening:** Students must be in compliance with immunization policies of the Health Sciences program in which they are enrolled. The Program Director will provide students with health requirements applicable to that program and the deadline by which students must submit proof of meeting such requirements. Students not meeting the program deadline may be dismissed from the program. Students will be responsible for the costs of completion for all immunization requirements.

Students are advised that each clinical setting determines its required immunizations and other clinical clearance items. The following is a description of immunizations that may be required and the type of documentation that a student would have to provide to verify the requirements have been met. If there is a communicable disease outbreak, additional vaccinations may be required. Proof of all immunizations and tuberculin skin tests should be submitted as per requirements on the immunization form; a signature from the physician or nurse is not sufficient.

   a) **MMR (measles, mumps and rubella):** Students must provide proof of one of the following: written proof of two MMR immunizations given after the age of 15 months, at least 30 days apart, OR proof of a positive titer for each of these diseases. If a titer does not indicate immunity, a booster and second titer will be required.
   b) **Varicella (chicken pox):** A record of two doses of varicella vaccine OR proof of a positive IgG titer.
   c) **Tetanus/Diphtheria (Td) or tetanus, diphtheria and cellular pertussis (Tdap):** Proof of vaccination within the past 10 years.

d) **Hepatitis B:** students must either submit proof of completion of a three-dose Hepatitis B vaccination series <u>OR</u> a Hepatitis B Vaccine titer indicating immunity <u>OR</u> a signed statement of Hepatitis B vaccine refusal.

    i.   Students who received a two-dose series before the age of 18 will be required to submit a titer documenting immunity. If immunity is not established, students will need to complete a three-dose series.

   ii.   Students receiving the series for the first time in order to meet this requirement must also get an initial titer 1-2 months after completion of the series and submit the results to their LCCC Program Director.

  iii.   If the titer results indicate that the student is a non-converter, students are required to visit with a qualified health care provider about options. Students must submit documentation of the results of that visit, and any subsequent action taken in accordance with current CDC recommendations, as documented by the health care provider.

e) **PPD Tuberculin Skin Testing:** A two-step test within the last 12 months OR a negative IGRA (Interferon Gamma Release Assay) is required by the Health Sciences programs. Two-step testing is used to reduce the likelihood that a boosted reaction will be misinterpreted as a recent infection.

    i.   If the reaction to the first test is classified as negative a second test is to be done 1-3 weeks later.

   ii.   Students with a history of positive reactions to TB skin tests or a positive IGRA must provide a report of a negative chest x-ray within the last 12 months. If the chest x-ray is positive, a physician's written statement indicating incapacity to transmit TB will be required.

f) **Influenza vaccination:** Students must provide proof of vaccination or a valid exemption per each clinical site for the current year.

g) **COVID-19 vaccination:** Students may be required to provide proof of vaccination or a valid exemption per each clinical site's protocols for the current year. See the Addendum for additional information regarding COVID-19 immunizations.

g) **Vision Screening:** Record and results of vision screening for color blindness must be submitted. Some programs and/or clinical sites may have restrictions for color-blind individuals – please refer to program specific handbooks for this information.

4. **CPR Certification:** Students must present a valid American Heart Association (AHA) CPR or BLS card indicating **health care provider** certification which includes infant, child, adult and 1- and 2-man rescuer techniques, and AED. The certification must remain current throughout the clinical experience.

5. **Background Checks:** All Health Sciences students must undergo a criminal background check performed by the Health Sciences & Wellness (HSW)School vendor at the student's expense for most programs. In most cases, a student's acceptance into a Health Sciences program at LCCC will not be final until LCCC has received background check information from the reporting agencies and the background check is clear of disqualifying offenses. (See below.) If applicable to your program, once provisionally accepted into the program, no clinical assignment will be made until the criminal background check has been cleared. To facilitate completion of the background check, the student will provide a seven-year history of all names used during that time, all residences and work history. The background check includes the following elements:
- Social Security Number Trace (serves as an address /identity verification tool)
- Criminal History (felony/misdemeanor convictions/pending cases at county, state and national level)
- OIG/GSA (searches the Office of Inspector General and General Service Administration for Fraud against any federally funded health care program, i.e. Medicare/Medicaid, etc.
- Nationwide Sex Offender Registry
- Excluded parties list service

a) LCCC requires only one background check prior to final acceptance and subsequent enrollment into an academic program. The student must pay the one-time fee directly to the company performing the background investigation. Please be aware that while most health care facilities with whom LCCC has affiliation agreements will accept this verification of a background check, some may require additional

compliance. A student not completing the background check in the timeline required may be dismissed from the program. (Refer to 14.e)

b) Students must accurately provide all names used in the last seven years, all residences, and all sites worked in the last seven years when completing the background check application. Failure to complete the background check application accurately will be considered falsification of records and will result in either or both of the following – students will be required to complete an additional background check at their cost and/or students will be dismissed from the program. (Refer to 14.e)

c) The following disqualifying offenses **will** prevent admission:
1. A conviction for any felony involving violence, sexual offenses, child abuse, or elder abuse **(No time limit)**
2. Any felony conviction in the last seven years
3. Any misdemeanor in the last seven years involving violence, sexual offenses, child abuse or elder abuse
4. Registered sex offenders (**No time limit**)
5. OIG/GSA and Medicaid Sanctions **(No time limit)**
6. Any student who is currently on probation, parole, or under any type of deferred sentencing guidelines. Students who have successfully completed the terms of a deferred adjudication agreement will not be disqualified.

d) The following potentially disqualifying event **may** prevent admission:
1. Except as applies above, any misdemeanor in the last seven years will be evaluated based on the nature of the offense, length of time since the offense occurred, etc. The student may be asked to provide more information which will be evaluated by the Health Sciences and Wellness Dean on a case-by-case basis, and may still prevent admission. **The decision of the Dean is final**.

e) If any applicant believes the criminal background check is inaccurate, the applicant may appeal the decision in writing to the Dean of Health Sciences and Wellness and request a review of the report and/or decision within 7 business days of receipt of dismissal notification. An appeal review committee made up of the Dean and at least two Program Directors, other than the program to which the student seeks enrollment will review the case and make a determination within 7 business days. It is the applicant's responsibility to produce substantial evidence that proves the background check is inaccurate. If the decision to dismiss has been upheld than dismissal proceedings will be followed with notification of the Dean of Students. (Refer to 14.e)

f) If there is a conviction that does not disqualify the applicant/student from a program and subsequent affiliation, the student should be aware that this may not be the case for the professional certifying/licensing agency. It is the student's responsibility to confirm whether or not the conviction will prevent them from taking a certification/qualifying examination or obtaining a license to practice upon completion of an academic program.

g) A student seeking readmission to the same or another LCCC healthcare program will be required to complete a new background check and drug screen unless that student has been continuously enrolled in an HSW healthcare program at LCCC. Please check with your program specific policies as they relate to readmission.

6. **Pre-admission and Pre-clinical Drug Screening:** All Health Sciences students are required to submit a pre-clinical urine drug screen.
a) The drug screen is completed at the student's expense and must be paid for at the time of application via the HSW school vendor website. The vendor is responsible for chain of custody processes and collection site identification, lab analysis and review of positive results by a Medical Review Officer.
b) Students will receive an electronic and/or printable copy of the chain of custody form and will need to hand carry that form (either on their personal electronic device or printed) to one of the listed collection sites. A SAMSHA (Substance Abuse and Mental Health Services Administration) certified laboratory will conduct the urine screening and will post all negative results to the Health Sciences Program Director or designee.
c) If a student provides a diluted sample, the student will be notified, and an additional test must be purchased via the vendor website at an additional cost to the student. Two consecutive negative-dilute results will act as a positive result which will result in an investigation of the incident and may include a retest and/or

suspension from the program. In the event of a suspension from classes, students may invoke their rights under the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

d) If a student tests positive for substances, the lab will contact the Medical Review Officer (MRO). The MRO will contact the student to elicit any prescriptive drug usage and will subsequently inform the Health Sciences Program Director or designee as to the final results.

e) If a student challenges a result, only the original sample can be retested. The student must request an order for a retest of the sample through the MRO. All positive samples are retained for one year in a frozen state. The student is responsible for the cost of this test.

f) If the MRO determines there are safety sensitive issues/concerns related to a student's drug profile further evaluation by a professional will be required and a student may be on temporary exclusion from the program until the evaluation is completed. Students testing positive for drugs that are illegal substances in Wyoming, non-prescribed legal substances, or students deemed unsafe for the clinical setting by the MRO will not be permitted to attend Health Sciences didactic and/or clinical courses. In the event that a student is suspended from classes the student may invoke their rights under the Student Discipline Adjudication Procedure 3.16P. Students who are licensed or certified in a health profession and test positive for these drugs will be reported to their respective Boards. (Refer to 14.c, 14.e, and 15)

g) Students will NOT be allowed to use previous drug screens requested by any person or agency outside LCCC to meet these requirements.

h) Students failing to test during the date and time documented on the Drug Testing Letter do not meet the requirement for drug testing and may be suspended from all Health Sciences courses. In the event of a suspension from classes students may invoke their rights under the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.c)

7. **Random Drug Screening**: Random drug testing will take place for LCCC Health Sciences and Wellness School students. Please check your program policies for specifics that may only be required for your program.

The random testing will be unannounced. The selection of individuals will be made through a random pool selection process. Notification shall take place at any time prior to test administration. Testing shall be in the form of urinalysis screening with confirmation by a licensed and SAMSHA certified laboratory and will be scheduled within 4 hours of notification. In most instances, the cost of the random testing is covered in the fee paid by students at the time of background check and initial drug screen.

Failure to comply with any aspect of the Random Drug screening requirements is cause for discipline up to and including dismissal from the program. In the event of suspension/dismissal from classes, the student may utilize the process under the Program Handbook and the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

If a student provides a dilute sample, the student will be notified, and the student will need to complete another drug screen at their own expense. Two consecutive negative-dilute results will act as a positive result which will result in suspension from the student's respective program. In the event of a suspension/dismissal from classes, students may invoke their rights under the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

8. **"For Cause" Drug Screening:** The information below refers to the use/misuse of, or being under the influence of: alcoholic beverages, illegal or prescription drugs which impair judgment, or demonstrate behavior consistent with impairment while in attendance on campus for class or other related activities, or at any health care facility, school, institution or other work location as a representative of a Health Sciences Program. If the clinical instructor/clinical site supervisor perceives the student is unable to perform competently, exhibits symptoms of abuse, emits the odor of alcohol or other illegal substances, or exhibits behaviors such as, but not limited to, slurred speech, unsteady gait, or confusion, and these behaviors cause the faculty or clinical instructor to suspect the student is impaired the following steps are taken:

a) The on-site clinical instructor will remove the student from the patient care or assigned work area and notify the clinical contact at the site and the LCCC Clinical Coordinator. The student will be required to complete a Drug and Alcohol test within four hours of the incident, or as soon as reasonably possible.

b) Upon student's oral consent, the on-site clinical instructor will assist the student in finding safe transportation to the drug testing site, and following that, home – at the student's expense. If the student insists on leaving the college or health care facility unattended, he/she will be advised that it is against the Health Sciences programs policy and is an unsafe action.

c) The student is to have a picture ID in his/her possession.

d) Drug screening is required, regardless of admission of the student to use.

e) An incident report will be submitted to the Program Director within two working days by the on-site clinical instructor. A meeting with the student, faculty member and director will be scheduled to:

    i. Review the incident report

    ii. Provide the student with another opportunity to offer further explanation and additional relevant information

    iii. Discuss procedures to be followed if the policy is carried forward

    iv. Discuss academic consequences related to alleged policy violation. Complete a care team report if applicable.

    v. The meeting is to be documented in writing to include description of the incident, who was present, time, date, place, actions and reactions.

f) If the results of the test(s) are negative for drugs, alcohol, or other illegal substances, or for non-prescribed legal substances, the student shall meet with the Clinical Coordinator and/or Program Director within two working days of the test results to discuss the circumstances surrounding the impaired clinical behavior. The student may return to the classroom and clinical setting, and the faculty will provide opportunity for the makeup of missed work and assignments, subject to considerations listed below.

    i. If the indicator was the odor of alcohol or other illegal substances, the student will be mandated to discontinue the use of whatever may have caused the alcohol-like odor before being allowed to return to the clinical setting.

    ii. If the indicator was behavioral, consideration must be given to a possible medical condition being responsible for the symptoms. A medical referral for evaluation may be indicated and a Care Team Report filed if applicable.

    iii. Based on the information provided and further medical evaluations if warranted, the Program Director, in consultation with the School Dean, will make a decision regarding return to the clinical setting.

g) If the results of the test are dilute, another for-cause drug screen must be completed within four hours of notification at the student's expense. Two consecutive negative-dilute test results will act as a positive result which will result in suspension from all Health Sciences courses. In the event of a suspension/dismissal from classes, students may invoke their rights under the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

h) If the results of the test(s) are positive for alcohol or other illegal substances or for non-prescribed legal substances, the Program Director will initiate suspension/dismissal of the student from all didactic and clinical courses. In the event of a suspension/dismissal from classes, students may utilize the process under the Program Handbook and the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

    i. The student will pay for all costs associated with the For-Cause Drug-Screening test. The student may request at their own expense, a second sample be tested to rule out false positives. This must be completed the same day. It is the student's responsibility to contact a company and pay for the drug screen.

i) If the student with positive results holds a certificate or license in a health profession, screening result test will be reported to the applicable Board.

j) If a student refuses "For-Cause" Testing:

    i. The on-site clinical instructor will remove the student from the clinical setting pending a full investigation.

    ii. The on-site clinical instructor will contact a transportation service to request that the student be transported home, at student expense. It is a violation of the Health Sciences program policy for a student to leave unattended and is an unsafe action.

k) Failure to comply with any aspect of a For Cause Drug Screening requirements will result in suspension/dismissal from the program. In the event there is a suspension/dismissal from classes the

student may utilize the policies in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P. (Refer to 14.e)

9. **Self-Disclosure:** Self-disclosure by a student of an alcohol/substance-abuse problem (past or present), the student is subject to a "For Cause" drug screen at their own expense for the duration of their enrollment in an Allied Health program at LCCC. The Health Sciences and Wellness "For Cause" procedures will be followed for instances of self-disclosure.

Failure to comply with any aspect of the "For Cause" Drug Screening requirements will result in suspension/dismissal from the program. In the event there is a suspension/dismissal from classes, the student may utilize the policies in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P. (Refer 14.e) The Dean of Students and the Care Team will be notified.

10. **Readmission Guidelines Related to Substance Abuse:** Students seeking readmission to Health Sciences programs after dismissal for reasons related to substance abuse should refer to their respective program policies for any specific guidelines. Generally, a student will be required to:
    a) Submit a letter requesting readmission to the Health Sciences program.
       1. Include documentation from a licensed therapist specializing in addiction behaviors indicating status of abuse, addiction, or recovery and/or documented rehabilitation related to the alcohol/drug illness.
       2. Include documentation of compliance of a treatment program as identified by the therapist including a statement that the student will be able to function effectively and provide safe and therapeutic care for clients in a clinical setting.
    b) Repeat drug screen for alcohol/drugs immediately prior to readmission. If a student, after being readmitted to the Health Sciences program, has positive results on an alcohol/drug screen, the student will receive permanent dismissal from the Health Sciences program.
    c) Complete any other program specific admission actions based on specific program requirements.
    d) Complete any other requirements made by LCCC.
    e) Completion of the requirements above does not guarantee readmission to a program.

11. Insurance: Students must be aware of insurance requirements and their responsibilities in relation to insurance.
    a) Given the potential exposure to communicable disease it is highly recommended that students in Health Sciences programs have health care insurance... Some clinical agencies may require those students who come to that facility for clinical learning experiences have health care insurance.
    b) If a student is injured or becomes ill during the clinical experience, an LCCC and/or program incident form and verification of other insurance coverage must be completed. Incident forms may be obtained from the applicable Program Director's office. Completed forms are submitted to the Health Sciences Program Director for signature and then forwarded according to campus procedure.
    c) Students are responsible for their own transportation and vehicle insurance to and from the clinical agency. No insurance coverage is provided for any non-LCCC vehicle.
    d) LCCC Health Sciences students are covered under LCCC's medical professional liability and general liability insurance while performing in the clinical setting as part of their Health Sciences course work.

12. **Standard Health and Safety Practices:** Students are required to follow this list of standard health and safety practices, and any program/facility specific requirements and to complete a (**Waiver of Liability Form**) included in the appendix of this document or see Program Director.
    a) All bodily fluids are considered potentially infectious and are treated as if known to be infectious for HIV, HBV, and other blood borne pathogens.
    b) Contaminated sharps shall be handled per OSHA guidelines, and specific program policy.
    c) Contaminated sharps must be placed in an appropriate container as soon as possible.
    d) Eating, drinking, smoking, applying cosmetics or lip balm, and handling contact lenses are prohibited in the work area where there is a likelihood of occupational exposure. Mouth pipetting/suctioning of blood or other potentially infectious materials is prohibited.

e) When exposure to pathogens is possible, personal protective equipment (PPE) shall be used. Personal protective equipment includes:

    i. Gloves shall be worn when it can be reasonably anticipated that the individual may have hand contact with blood, other potentially infectious materials, mucous membranes, and non-intact skin, when performing vascular access procedures, and when touching contaminated items or surfaces.

    ii. Masks, eye protection, and face shields shall be worn whenever splashes, spray, splatter, or droplets or other potentially infectious materials may be generated and eye, nose, or mouth contamination can be reasonably anticipated.

    iii. Gowns, aprons, and other protective body clothing shall be worn in occupational exposure situations and will depend upon the task and the degree of exposure anticipated.

    iv. Surgical caps or hoods and shoe covers shall be worn in instances when gross contamination can be reasonably anticipated.

    v. Hand hygiene shall be performed immediately after removal of gloves or other personal protective equipment.

f) When exposure to other hazardous materials such as disinfectant solutions is a possibility, appropriate PPE and safe handling protocols shall be used.

13. **Exposure Guidelines**: If exposed to blood from a needle stick, blood, or body fluid comes in contact with mucous membranes or an open wound during a laboratory or clinical experience, the student should:

a) Needle stick injury, cuts, scratches, or human bites involving blood or body fluids:
1. If near a sink, immediately rinse the injured area in flowing, cold tap water.
2. Wash the injured area for 10 minutes with soap and water or a disinfectant wipe if soap is not available. Rinse with water.
3. Cuts, scratches, or bites contaminated with potentially infectious materials should be pulled apart gently with a gloved hand to open the tissue. Treat as above.
4. Blot the area gently, cover the wound, and seek medical assistance immediately through your clinical facility or program procedure.

b) Eye, mouth, and mucous membrane exposures:
1. Splashes of potentially infectious materials to the face, eyes, nose and/or mouth or to non-intact skin warrants immediate, gentle flushing of the eye, nose, mouth, or skin lesion with large amounts of room temperature tap water for 10 minutes if available. The goal is to promote rapid dilution of the material without irritating the mucous membranes or underlying tissues. The nose or abraded skin, **BUT NOT THE EYE**, can be rinsed with dilute soap water as a gentle wash solution when feasible. The area should be rinsed with water.
2. Seek medical assistance immediately.

c) Report the incident immediately to the site supervisor or clinical instructor.

d) The on-site clinical instructor must notify the Program Director and Clinical Coordinator.

e) The on-site clinical instructor must complete an incident report for the clinical agency and LCCC.

f) The clinical coordinator and/or program director may assist the student in completing the incident report as required by the specific program requirements, and may also include any forms required by the college's insurance company.

g) The exposed student should be tested for HIV antibodies within **10 days** and students are responsible for the costs of this testing. The on-site clinical Instructor and/or program director are to document the exposure incident and provide copies for the student's file. The incident report needs to be filed at the clinical organization and retained in the student's file at LCCC.

h) The LCCC HSW School will follow CDC recommendations.

14. **Professionalism:** Students enrolled in a program of study in the School of Health Sciences and Wellness are responsible for conducting themselves in a professional manner at all times. Some specifics of professional behavior include:

a) **HITECH ACT of 2009 and HIPAA:** All verbal, electronic, and written information relating to patients/clients and contracted agencies is considered confidential and is not to be copied or discussed

with anyone or removed from a health care facility unless written permission has been given by the clinical agency to remove such information. Information may be disclosed only as defined in HIPAA guidelines for educational purposes. A breach of confidentiality will result in disciplinary action under the guidelines outlined in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P, which may result in possible failure of the course/program and may lead to immediate suspension and/or subsequent dismissal. (Refer to 14.e)

b) **Professional staff client relationship and student behavior:** Health Science students strive to inspire the confidence of clients. Students must treat all clients, health care providers, peers, faculty, and staff professionally. Clients can expect those providing Health Sciences services to act in their best interests and respect their dignity.
 i. The student should abstain from excessive personal disclosure, obtaining personal gain at the client's expense and refrain from inappropriate involvement in the client's personal relationships.
 ii. In a student role, professional boundaries exist among the student, the instructor, the clinical staff, and the client. Students should abstain from judgmental behavior, intimidation, profanity, defiance, and derogatory comments to all individuals with which the student may have contact through the course of their educational experience. Students unclear of proper behavior or of an appropriate response to an individual should consult the instructor for guidance.
 iii. Personal electronic devices: Cell phones, iwatches, Samsung watches and all other personal electronic devices (PED) must be turned off and out of sight during lectures and labs, unless instructor approval has been provided. Any PED in sight may be confiscated by the instructor and kept until the end of the day's activities. Any use of a PED during quizzes, tests, exams and other academic activities will be construed as cheating and treated accordingly. Any response to a PED must only be completed during breaks only. Violation of this policy is grounds for discipline up to and including dismissal from the program.
 iv. PEDs must not be carried into patient care areas and/or clinical experiences. At no time may students take photographs of any patient or obtain any HIPAA information for personal use. The unauthorized recording of patients or patient information in any format is strictly forbidden.. Violation of this policy is considered grounds for immediate suspension/dismissal from the program.
 v. Students are expected to maintain high standards of academic integrity including; completing assignments independently (unless authorized), reporting accurate results when conducting research, avoid cheating and plagiarism. A student's first offense will be handled by the instructor. Repeated documented violations will result in disciplinary action under the guidelines outlined in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P, which may result in possible failure of the course and/or suspension/dismissal from the program.
 vi. Students are expected to act in accordance with all program guidelines while in the classroom, laboratory, and clinical settings. Repeated violations of expected behaviors may result in failure of the course, laboratory, or clinical, and up to dismissal from the program.
 vii. Student professional conduct violations will result in disciplinary action under the guidelines outlined in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P, which may result in possible failure/dismissal from the course and/or program. (Refer to 14.e)
c) **Immediate Suspension:** Any Health Sciences program student engaging in any of the following behaviors or other misconduct is subject to *immediate suspension* from Health Sciences classes and disciplinary action as described in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P.
 i. Intentionally or recklessly causing physical harm to any person on the campus or at a clinical site, or practicing unsafe behaviors that could lead to harm.
 ii. Unauthorized use or possession of any weapon or explosive device on the campus or at a clinical site.
 iii. Unauthorized use, distribution, or possession for purposes of distribution of any controlled substance or illegal drug on the campus or at a clinical site.

c. **Professional appearance:** Proper hygiene and professional appearance are expectations of all Health Science and wellness students. Specific requirements will be found in the Program Handbook or provided to students by the program faculty.

d. **Social Media Policy**

Online communication through social media and networking is a recognized form of daily communication. The Health Sciences and Wellness School has expectations for responsible, professional and ethical behavior with this form of interaction and expression. This policy and guidelines are intended to more clearly define expectations for appropriate student behavior related to social media and to protect the privacy and confidentiality of patients, fellow students, faculty, staff, clinical educators and affiliated facilities. For the purposes of this policy, "social media" include but are not limited to:

- Social networking sites such as Facebook or LinkedIn, etc.
- Video and photo sharing websites such as YouTube, Snapfish, Flickr, Snapchat, Instagram, etc.
- Microblogging sites such as Twitter, Weblogs and online forums or discussion boards
- Any other websites or online software applications that allow individual users to post or publish content on the Internet

Students are expected to understand and abide by the following guidelines for use of social media:

- Students should be aware that there is really no such thing as a private social networking site.
- Comments can be forwarded or copied and search engines can retrieve posts years after the original publication date, even if the post has been deleted.
- Employers are increasingly conducting web searches on job candidates before extending offers. Content posted that is unprofessional or irresponsible may cost students job opportunities.
- Understand that as part of entering a profession, students will interact with individuals who reflect a diverse set of customs, values and points of view.
- Students are prohibited from initiating "friend-requests" (or the like) with LCCC faculty, staff, and clinical instructors/clinical supervisors/preceptors or other staff of facilities to which they have been assigned.
- If an established relationship already exists between students and LCCC faculty and staff in a respective program on any social media platform, the faculty or staff member will initiate "unfriending," "unfollowing," or "blocking" the student in order to preserve the expected professional boundaries between students and LCCC personnel.
- Students are also prohibited from initiating or accepting friend requests from patients/clients of those clinical facilities.

A violation of the privacy of a patient, instructor, clinical affiliate, college faculty/staff member or classmate is extremely serious. This includes violations to HIPAA and the "Family Educational Rights and Privacy Act of 1974" (FERPA) policies and additionally may include disclosure of confidential information related to business practices of clinical affiliates. Such behavior may result in failure of a clinical practice course, dismissal from the program, and may also put the student at risk of legal liability.

Students utilizing social media should make absolutely no reference to patients, clinical sites or clinical instructors, even if names are not given or if the student attempts to remove identifying information from the comment.

- Posting/publication/distribution of pictures, audio or video of patients, clinical affiliate facilities/instructors/staff, college facilities/faculty/staff or classmates is prohibited unless the student receives written permission from the subject(s), clinical affiliate, and the Program/college.
- Students should use discretion when selecting the appropriate time and place for utilizing social media so as not to interfere with classroom instruction/learning or clinical experience performance. For example, posting "status updates" during class or during the clinical day from a smart phone is prohibited.

Violations of the social media policy are considered professional behavior violations and will result in programmatic counseling or other disciplinary action, up to and including program dismissal.

e) **Student Grade/Dismissal Appeals Processes:** Students have a right to appeal an academic process or sanction imposed on them and must follow the guidelines in the Program Handbook and the Academic Appeals Procedure 2.16P.

Students have the right to appeal a student discipline process or sanction imposed on them and must follow the policies in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P. In all cases the Dean of the HSW School and the Dean of Students will be notified.

15. **Duty to Report:** All students enrolled in Health Sciences programs have the following duty to report:
    a) Students holding or receiving certification or licensure in a health profession must remain in good standing with the Board that issues their certification or licensure. Students receiving any disciplinary actions against their certificate and/or license must notify their Program Director within five (5) business days.
    b) Any student who is placed on the Office of Inspector General (OIG) List of Excluded Individuals/Entities (LEIE) list must notify their Program Director within five (5) school days.
    c) Any student who is charged or convicted of an offense that fall into any category in the disqualifying offenses list in section 6c above, the student must notify the Program Director immediately.
    d) Failure to report will result in the Program Director's right to suspend the student's participation in clinical experiences and /or initiate discipline up to and including dismissal from the program.
    e) Laramie County Community College and the School of Health Sciences and Wellness reserve the right to require a new criminal background check at its sole discretion. . The student's participation in clinical experiences may also be subject to interim suspension under Student Discipline Adjudication Procedure 3.16P.

Part 2: Nursing Program

Welcome to the Nursing Program

The nursing faculty of Laramie County Community College extends a warm welcome to you. Our desire is to assist you in your goal of becoming a professional registered nurse. When accepted in the Nursing Program, you have accepted a commitment to the program to become an ADN (Associate Degree in Nursing) Registered Nurse. While completing your 2-year ADN degree, you do have the option at the end of the first year, to take the Practical Nurse National Council Licensure Exam (NCLEX-PN).

You are also automatically eligible for dual enrollment in the University of Wyoming's ReNEW program to pursue your bachelor's in nursing, (BSN). The long-term benefit of the ReNEW curriculum is the ability for ADN graduates to move seamlessly toward their baccalaureate degree through online classes in as little as two additional semesters.

This handbook serves as a guide for you throughout your nursing education. The program philosophy, goals, policies, procedures, and other information were developed by the nursing faculty, with contributions from students and other college personnel.

The LCCC Nursing Program is committed to a high standard of educational and clinical excellence while providing and promoting learner responsibility, professional behaviors, effective communication, critical thinking, time management, and collaboration. The Nursing Program holds all students to the following expectations, but is not limited to:

- Demonstrate professional behaviors at all times.
- Comply with all policies and procedures within LCCC, school, and program.
- On time for all scheduled events in the nursing program (classes and clinical activities, etc.).
- Prepare in advance for class and lab activities and assignments.
- Provide your own transportation to assigned clinical sites.
- Provide your own laptop or tablet for use in test taking and classroom activities.
- Completion of all assignments in each nursing course is required to pass the course.

The Nursing Handbook is designed to supplement the LCCC college catalog as well as LCCC & Health Science and Wellness student handbooks by responding to policies which are specific to the Nursing Program. Please refer to these documents as needed. The current handbook is available online in the each of the Canvas nursing course shells. Laramie County Community College and the Nursing Department reserve the right to change, without notice, any of the material, information, policies, procedures or costs published in this handbook. If revisions or additions to the Nursing Handbook are required, they become effective immediately and students are notified in a timely manner through announcements in Canvas (the Learning Management System, LMS).

Failure to comply with policies and procedures may result in immediate suspension and/or dismissal from the program. Dismissal from the Nursing Program may also result if, after counseling, the student fails to correct errors. A severe infraction may lead to immediate dismissal from the program.

Students entering the program at any level will fall under the academic regulations and policies of the current handbook. Students are responsible for reading and complying with the most current information in the Nursing Handbook in the LMS. Each semester, **students are required to complete a Canvas quiz acknowledging receipt and awareness of and compliance with the information in this Handbook. Students who do not take the required quiz are still accountable and held responsible for all content and updates in the current handbook.**

Mission, Vision, Philosophy

The Health Science Program Mission Statement

The program's mission is to provide a general education core curriculum enhanced with health science related courses that allow a student the flexibility to move into various healthcare career pathways, most specifically within the School of Health Sciences and Wellness.

LCCC Nursing Program Mission and Purpose: LCCC Nursing Program recognizes the values, worth and uniqueness of students preparing to practice and accepts the challenge of providing and inspiring a pathway for educational and career mobility in order to transform student's lives.

LCCC Nursing Program Vision:
Guided by our accrediting agencies – ACEN as well as the direction of the LCCC's core values,
1. We have a commitment to quality through academic excellence.
2. Through passion and caring we strive to make a difference.
3. We promote tolerance and diversity.
4. Dedicated to upholding the integrity of the nursing profession.
We believe the goal of nursing is to use the nursing process and clinical judgement to promote and maintain health, prevent disease and disability, care for and rehabilitate the sick, and support the dying.

ReNEW Mission and Purpose: The LCCC Nursing Program recognizes the values, worth and uniqueness of students preparing to practice in rural Wyoming and accepts the challenge of providing a pathway for educational and career mobility.

ReNEW Vision: Shared, concept-based, statewide curriculum where students can earn an associate degree or continue seamlessly to the BSN degree (or higher) starting at any of the Wyoming Community Colleges or the University of Wyoming (UW). The courses/clinical experiences needed to complete the Bachelor of Science in Nursing degree through UW will be available through distance delivery.

In order to best facilitate that pathway, the LCCC nursing faculty have been an active part of the creation of a statewide nursing curriculum: Revolutionizing Nursing Education in Wyoming (ReNEW). The goal of the Program is to develop professional life-long learners through a scientific and holistic approach in a learner-centered environment. ReNEW is a concept-based clinical education model focusing on enhancing clinical judgment, skill development and professional nursing practice. The curriculum was developed through shared leadership with education and practice partnerships to:
- Co-create the nursing curriculum.
- Optimize the use of clinical facilities and faculty throughout the state of Wyoming.
- Share educational and clinical resources.

Philosophy

The nursing faculty subscribes to the stated mission, vision, values, and goals of ReNEW in its entirety. We believe in the intrinsic value and worth of every person. We believe that health is a state of homeostasis influenced by forces impacting the person. Nursing is a practice-oriented discipline that uses evidenced-based knowledge derived from the biological, physical, and behavioral sciences to provide safe and humanistic care to persons, families, groups, and communities. The art and science of nursing is the nucleus of the interdisciplinary health care system. We believe the goal of nursing is to use the nursing process and clinical judgment to promote and maintain health, prevent disease and disability, care for and rehabilitate the sick, and support the dying. Nursing education must have a strong clinical focus and allow opportunity to apply the theoretical component of nursing.

Learning is a dynamic lifelong process, occurring in the cognitive, psychomotor, and affective domains. Learning is the joint responsibility of the educator and the learner with each assuming the responsibility for learning and continued self-development. The role of the educator is to facilitate learning and leadership by providing an environment wherein students have the opportunity to establish goals, examine various means of attaining them, and evaluate the course of actions selected. Practitioners of nursing have a responsibility for professionalism and the mentoring of others. The nurse is a role model for clients, families, and communities in terms of practicing appropriate health behaviors.
(Reviewed 12/23)

Core Values of the Nursing Program

LCCC Nursing Program is guided by professional standards outlined in the NLN Core Competencies for Graduates of Associate Degree Nursing Programs and the scope of practice for professional nurses directed by the Wyoming State Board of Nursing.

Conceptual Framework

The curriculum is guided by professional standards in the National League for Nursing's Core Competencies for Graduates of Associate Degree Nursing Programs, Accreditation Commission for Education in Nursing, and the scope of practice for Registered Nurses as directed by the Wyoming State Board of Nursing.

The curriculum is organized with six (6) core concepts that are threaded through each course to provide the foundation for appropriate delivery of effective, safe, competent, and appropriate nursing care to diverse populations in a variety of health care settings. The progressive development of these concepts leads to achievement of leveled student learning outcomes. Each ADN Course Student Learning Outcomes (SLOs), which identifies the expectations of each ADN student each semester, is linked to the appropriate core curriculum concept and ADN program student learning outcome, ultimately linking seamlessly to the bachelor degree program student learning outcomes.

Students are evaluated each semester on their progress to their end of program learning outcomes indicated below. Through the final course evaluation process where benchmarks are examined in light of the student's performance, students and instructor discuss the student's performance in each of the levelled course outcomes. Students progressively work throughout the program to meet expected levels of achievement each semester and ultimately to the expected levels of achievement for the six program student learning outcomes listed below.

Registered Nurse (RN) Core Concepts and Outcomes
LCCC Nursing Curriculum Core Concepts & Outcomes
(Reviewed 12/23)

Core Concept Definition: Safety: Minimize the risk of harm to patients and providers through system effectiveness and individual performance.

ADN Program Student Learning Outcome 1 (Safety): Provide safe nursing care within the healthcare system.
    Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Adhere to safety standards when providing nursing care.
  Explain the role of the nurse in supporting patient safety.
- **NURS 1200 – Chronic**
  Apply strategies to reduce the risk of harm to patients and providers with consideration for professional standards.
  Demonstrate the role of the nurse in supporting patient safety.
- **NURS 2300 – Acute**
  Identify organizational responsibilities in providing a culture of safety.
  Analyze the role of the nurse in promoting safe practice.
- **NURS 2400 – Complex**
  Participate in guiding safety and care management within the healthcare system.
  Model the role of the beginning nurse in the provision of safe, quality nursing care.

Core Concept Definition: Clinical Judgment: The educated conclusion at which a nurse arrives guided by the nursing process and evidence of best practice.

ADN Program Student Learning Outcome 2 (Clinical Judgment): Incorporate prior knowledge, current research, and clinical experience in decision-making.
    Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Begin to use the steps of the nursing process to provide care and promote health.
  Identify the role of evidence and appropriate sources in guiding decision-making.

- **NURS 1200 – Chronic**
  Apply the nursing process for plans of care.
  Begin to incorporate evidence when planning nursing care.
- **NURS 2300 – Acute**
  Utilize evidence-based practice and clinical findings to care for patients.
- **NURS 2400 – Complex**
  Prioritize care of multiple patients with increasing independence using evidence and clinical judgment.

Core Concept Definition: Leadership: Heightened self-awareness to empower others toward the attainment of a specific objective through the practice of nursing excellence. Leadership is exemplified through interprofessional collaboration in management of care in a diverse and complex healthcare system.

ADN Program Student Learning Outcome 3 (Leadership): Demonstrate leadership skills as part of an interprofessional team to promote desired outcomes.

Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Identify the leadership role of the nurse in the healthcare system.
  Recognize the role of the nurse in healthcare delivery.
- **NURS 1200 – Chronic**
  Develop beginning leadership attributes, such as prioritizing, delegating, and managing resources.
  Participate as a member of the interprofessional team.
- **NURS 2300 – Acute**
  Demonstrate leadership attributes when prioritizing, delegating, and managing care.
  Contribute as a member of the interprofessional team.
- **NURS 2400 – Complex**
  Evaluate leadership effectiveness within a variety of healthcare settings.
  Coordinate healthcare delivery with the interprofessional team.

Core Concept Definition: Patient Centeredness: An orientation to care that incorporates and reflects the uniqueness of an individual's back ground, personal preferences, culture, values, traditions, and family. A patient-centered approach supports optimal health outcomes by involving patients and those close to them in decisions about their clinical care. Patient-centeredness supports respectful, efficient, safe, and well-coordinated transition through all levels of care.

ADN Program Student Learning Outcome 4 (Patient Centeredness): Use effective communication and advocacy to provide individualized care.

Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Identify the influence of patient needs, values, and choices when individualizing care.
  Recognize effective communication techniques used in establishing therapeutic relationships.
  Explore the nurse's role in advocacy.
- **NURS 1200 – Chronic**
  Provide basic, safe and effective, individualized care.
  Use effective communication techniques to establish therapeutic relationships.
  Identify the need for advocacy in patient care.
- **NURS 2300 – Acute**
  Modify care to meet individual patient needs.
  Incorporate effective communication techniques to maintain therapeutic relationships.
  Practice basic advocacy when participating in patient care.
- **NURS 2400 – Complex**
  Coordinate individualized care for diverse patients.
  Adapt communication techniques to strengthen relationships.
  Model advocacy in nursing practice.

Core Concept Definition: Professionalism: The consistent demonstration of core values evidenced by nurses working with others to achieve optimal health and wellness outcomes in patients, families, and communities by wisely applying

principles of altruism, excellence, caring, ethics, respect, communication, professional engagement, lifelong learning, and accountability.

ADN Program Student Learning Outcome 5 (Professionalism): Practice within the core values, principles, and standards of the nursing profession.

Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Identify the core values of professional nursing.
  Identify the legal and ethical basis of nursing practice, including scope of practice.
- **NURS 1200 – Chronic**
  Articulate core values and principles of the nursing profession.
  Relate legal and ethical standards to the scope of practice.
- **NURS 2300 – Acute**
  Demonstrate adherence to the core values and principles of the nursing profession.
  Apply legal and ethical standards to the scope of practice.
- **NURS 2400 – Complex**
  Exemplify the core values and principles of the nursing profession.
  Maintain the legal and ethical standards of professional nursing practice.

Core Concept Definition: Health Promotion: The provision of education to patients to encourage healthy behaviors and choices, prevent disease, protect from preventable illness and disastrous emergencies, all of which make a positive contribution to immediate and long-term health status.

ADN Program Student Learning Outcome 6 (Health Promotion): Utilize the nursing process and a broad knowledge base to maximize health.

Course and Course Student Learning Outcome
- **NURS 1100 – Health Promotion**
  Utilize concepts of health promotion to educate patients across the lifespan.
- **NURS 1200 – Chronic**
  Develop evidence-based teaching plans to manage health and promote quality of life.
- **NURS 2300 – Acute**
  Adapt evidence-based teaching plans to manage changes in health status.
- **NURS 2400 – Complex**
  Prioritize educational needs and evidence-based strategies to optimize outcomes.

Practical Nurse (PN) Core Concepts and Outcomes
Students who begin their program at LCCC have the option to take the NCLEX –PN after successfully completing the second semester of the nursing program curriculum. Consistent with the End of Program ADN student learning outcomes (SLO), each PN Benchmark SLO is linked to one of the six core curricular concepts. The PN Benchmark SLOs are:

Safety
1. Utilize strategies that reduce the risk of harm to patients and providers considering professional standards.
2. Utilize technology that supports quality and safety.

Clinical Judgment
1. Apply the nursing process in providing appropriate fundamental, evidence-based care.

Leadership
1. Perform self-assessment of leadership abilities and responsibilities.
2. Use mutually respectful communication and collaboration, within interprofessional teams in providing patient care.
3. Function within established policies in structured healthcare systems.

Patient Centeredness
1. Use caring behaviors to provide safe and effective, developmentally and culturally appropriate care to patients.
2. Use therapeutic communication skills in the development of therapeutic relationships with patients and families
3. Apply the role of an effective advocate when participating in the care of patients.

Professionalism
1. Demonstrate principles of accountability, integrity, and autonomy while providing care for patients.

2. Demonstrate adherence to the scope of practice while providing care for patients.

Health Promotion
1. Employ the knowledge, skills and attitudes necessary to promote optimal patient outcomes.
2. Explore the role of the practical nurse in emergency preparedness.

(Reviewed 12/23)

Measures of Program Effectiveness

Laramie County Community College ADN Nursing Program uses the following criteria as measures of the effectiveness of the program:

Program Completion Rates:
- Associate Degree Nursing Program:
  - At least 75% of the students who begin the ADN program will successfully complete within 150% of program length once major nursing courses are begun.
- Advance Placement Students:
  - At least 85% of the students who enter the beginning of the second year of the ADN program successfully complete within 150% of program length once major nursing courses are begun.

Licensure Rates of Graduation:
- The NCLEX-RN pass rate for first time test-takers will be at or above 80% within the same 12-month period.
- The NCLEX-PN pass rate for first time test-takers will be at or above 80% within the same 12-month period.

Employment of Graduates:
- 80% of new graduates (seeking employment) will be employed within six months of graduation.

Standards of LCCC, Regulatory, and Accrediting Agencies:
- The Associate Degree in nursing program will continue to meet the standards of
  - Laramie County Community College
  - Wyoming State Board of Nursing
  - Accreditation Commission for Education in Nursing (ACEN)

Program Evaluation

Program evaluation is an ongoing process with input from the students, faculty, clinical facilities, administration, nursing advisory committee, community, nursing board, and accrediting agencies. Information obtained is utilized in updating the program. Following graduation, all individuals who completed the program are requested to evaluate the program through a survey. Information obtained from annual graduate and employer surveys of new graduates is utilized as part of the systematic program evaluations. The information obtained from biannual subscription reports of the LCCC graduates who took NCLEX the previous six months are utilized to make curriculum changes.

Classroom and Clinical Evaluations

The students evaluate all aspects of the program including input on required textbooks. All nursing classroom faculty will be evaluated once a semester utilizing LCCC online student survey system. Typically, during the week before finals, students receive an email from the LCCC to complete course evaluations. The purpose of these evaluations is to gather information for quality improvement and these surveys assist in the overall program's evaluation. Appropriate program changes may be made based on survey results. The surveys are completely anonymous and go directly to LCCC and not the nursing program. Faculty are unable to review the information until after final grades are posted.

The nursing program also collects anonymous survey information related to the clinical experience including the clinical facility, resources, clinical faculty, and self. The results of the evaluation are summarized and shared with the respective clinical facility and clinical faculty member at the completion of the semester. The survey is a tool the nursing program uses to assess the quality of the clinical site, student learning, and faculty performance. The survey is completely anonymous, and faculty do not see the results until after the grades are posted. **Formal written complaints regarding the program are processed according to the LCCC College procedures 6410, 6415, and 5750.**

(Reviewed 12/23)

Nursing Program Structure
Academic Year 2023 – 2024

Program Faculty and Staff

Program Director of Nursing:
Karen Bowen PhD, RN

Administrative Assistant:
Dawn Williams

Clinical Coordinator:
Angela Burge MSN, RN

Simulation Coordinator:
Sarah Schindler MSN, RN

Simulation Faculty:
P. Koslosky MSN, RN
S. Schindler MSN, RN

Level 1 Faculty (Semesters 1 and 2):
Semester 1:
S. Dellos MSN, RN
A. Burge MSN, RN
P. Koslosky MSN, RN
D. Kisiel MSN, RN

Semester 2:
J. Querry MSN, RN
A. Mathews BSN, RN
S. Dellos MSN, RN
P. Koslosky MSN, RN
A. Mathews BSN, RN

Level 2 Faculty (Semesters 3 and 4):
Semester 3:
D. Salyers MSN, RN
C. McAfee MSN, RN
J. Querry MSN, RN
S. Fails MSN, RN
D. Kisiel MSN, RN
S. Schindler MSN, RN

Semester 4:
S. Fails MSN, RN
D. Kisiel MSN, RN
S. Schindler MSN, RN
A. Burge MSN, RN
C. McAfee MSN, RN

(Revised 1/2024)

National Student Nurses' Organization (NSNA)

All questions related to the Student Nurses Organization should be directed to the nursing faculty mentor(s).
Membership in National Student Nurses' Association (NSNA) is voluntary.
Goals and directions for the year are decided annually by the members.
Officers include:

President

Organize and preside at regular meetings of the class and officers.
Assess the need for and coordinate the placement of class members on any committees deemed necessary, i.e., Pinning Committee occurs during second year.
Work with and coordinate activities of class and officers with LCCC Student Life Office.
Initiate and ensure effective communication between officers, the class, and faculty advisor.
Delegate tasks to appropriate officers and/or committees.
Ensure a smooth transition of information and materials to new class officers (as applicable)

Vice President

Assist President with workload.
Participate in committee assignments.
Perform all functions of the President in the latter's absence or upon his/her request.
Initiate and ensure effective communication between officers, the class, and faculty advisor.

Secretary

Maintain all class records and supplies.
Maintain detailed records of all officer and class meetings.
Maintain committee assignment lists.
Be responsible for all class correspondence.
Maintain a calendar of meetings/event.
Assist the President to ensure that all activities meet LCCC Student Life office guidelines and regulations.
Arrange transfer of all records to the incoming secretary (if applicable).

Treasurer

Maintain the appropriate class accounts through the LCCC Nursing Office or as directed.
Prepare for class audit by LCCC Accounting Services office as necessary.
Maintain receipts for all transactions (deposits, withdrawals, etc.).
Obtain authorization from faculty advisor for expenditures from the account.
Oversee all fundraising efforts with assistance from fellow officers and class.
Obtain written student ballot and faculty advisor's approval for any expenditures of $100 or more.
Arrange for the orderly transfer of class financial records to the incoming treasurer (as applicable).

Student Cohort Representative

The purpose of student representation at faculty meetings is to provide dialogue related to the nursing education program. Each cohort representative is chosen on a primarily volunteer basis and then approved by the nursing faculty AND program direction. The representative must be in good standing with the LCCC, HSW, and the Nursing Program.

The cohort representative will begin the semester by meeting with the program director for suggested presentation items they will bring to the faculty meetings and report on for their cohort. Student cohort representative facilitates the movement of constructive information between the faculty meeting and the student group. Solicit and evaluate appropriateness of input from class members regarding items which they wish brought before faculty. Suggested questions for gathering student feedback could include:

- What is working well in lecture? In lab?
- What is not working well in lecture? In lab?
- Are there any needs that are not being addressed?
- If applicable, have changes that have been implemented proved to be helpful? If so, how? If not, why?
- Are there any other comments, situation or ideas that the students would like to convey?

Individual concerns specific to faculty and/or classes are handled by following the communication chain of command as listed in the nursing program student handbook – see grievance procedure.

Resources for Student Success

Students may utilize the recreational and sports facilities available at the physical education complex. Due to the additional stress that the nursing student role can produce, physical activity is strongly encouraged. Student nurses are encouraged to take part in the varied student activities LCCC offers. Schedules of these events can be obtained from the Student Activities Director in addition to LCCC-wide posting of each activity.

Student Services:

http://www.lccc.wy.edu/services
Laramie County Community College offers a variety of student services. Refer to the current college catalog and LCCC student handbook for detailed explanations of available services.

Financial Aid

Students needing to finance their education through student loans or other assistance need to contact the LCCC Financial Aid Office (307-778-1215). The personnel in the financial aid office will assist the student in exploring other possible financial assistance such as grants, scholarships, or work-study. If the student decides on a student loan, it can be used only for educational costs. A student loan is a serious obligation and must be repaid. The student must notify the lender of any changes to name, address, telephone number, school status, or graduation date. If the student fails to notify the lender of these changes, the lender may not be able to contact the student and the loan could default.

The following possibilities could result with loan default:
- Reported to all national credit bureaus. This could prevent the individual from getting credit in the future for a car loan, home mortgage, credit cards, etc.
- Ineligible for deferments.
- Entire loan becomes due.
- Federal/state income tax refunds may be seized.
- Ineligible for further financial aid and other Federal benefit programs.
- Wages may be garnished.
- May be subject to court proceedings.
- Responsible for collection costs and attorney's fees which could increase total debt.

(Revised 7/2022)

Learning Commons: http://lccc.wy.edu/academics/services/tips.aspx

The LCCC Learning Commons helps students become independent, active, confident learners through a range of high-quality tutoring services and academic success skills assistance. Every student can benefit from discussing course content, homework, questions, study strategies, and test preparation with one of our trained, experienced nursing tutors! Specific services may be required/recommended for students as identified by nursing faculty. Students are expected to follow the instruction/direction of their faculty members regarding utilization of these resources.

Success Quick Tips:

Stay Positive
- Attitude is everything. Being positive actually allows learning to happen.
- Give yourself latitude – you are not the expert – you are in the PROCESS of learning.
- Ask for help. It is ok to do so.
- Reward small successes.
- Believe in yourself.

Study Skills
- Know your learning style. Understanding how you learn new and difficult information will aid in learning.
- Recommended study cycle: 20 minutes of studying followed by a 10-minute break, then repeat up to two hours.
- Study the hardest subject first.
- Give yourself permission to study and set the intention to learn.
- Create a study routine and dedicate a space to study.
- Use baroque music (barely audible) as background noise.
- Create and use mnemonics, flash cards, summary sheets, content maps, and other study aids.
- Review, recite, review. Review and recite daily – notes and study aids.
- Read the correlating chapter from your textbook BEFORE attending lecture.

Note Taking
- Attend class every day.
- Use color – either paper or pen.
- Pay attention to main points and points emphasized by the faculty.

- Create and use a uniform system of punctuations and abbreviations.
- Review your notes immediately after class to fill-in any missing information.
- Review your notes daily. Cover up the notes and ask yourself the questions you wrote in the left column.

Navigating the Textbook
- Read the introduction or learning objectives first.
- Read the summary.
- Write definitions to key terms and answer any chapter questions.
- Preview the chapter – look at headings, subheading, maps, pictures, charts, diagrams, and tables.
- Read one paragraph at a time and limit the number of pages read daily.
- Take notes in your textbook (write question in the margin after reading the paragraph). You will retain more information if you write in your book.

Time Management
- Make school your top priority. Investing in you now will assure future success.
- Set specific academic goals. For example, "I will earn an 'A' in NURS 1100 for the fall semester."
- Schedule, schedule, schedule. Schedule everything, not to fill every minute, but to keep you on track.
- Use a "to do" list and learn to say "no."

Test Taking
- Begin studying from the first day of class.
- Participate in class and study groups.
- Stay relaxed, confident, and alert during a test.
- Read the directions first and then preview the test – avoid cramming this does not work.
- Use test anxiety to your advantage. Let it give you the energy to propel you through the test.

Faculty Mentoring

Nursing faculty are available during posted office hours and by appointment to support students throughout the nursing program. Faculty are committed to mentoring nursing students throughout the nursing program. Students typically work with their faculty each semester for mentoring. Students can also continue to work with a faculty member from the previous semester. The main goal of faculty mentoring is to provide students with the support both academically and professionally to help prepare students to become a professional nurse. Topics for the mentoring sessions may include student's educational goals, clinical performance, and any concepts a student may be struggling with. Please utilize this time to your advantage. Come prepared with specific questions, a readiness to test your own knowledge, and plan to bake best use of time. Specific services may be required/recommended for students as identified by nursing faculty. Students are expected to follow the instruction/direction of their faculty members regarding utilization of these resources.

Academic Advising/Student Success Coaching

The nursing program is committed to students' academic success. To that end, upon acceptance into the nursing, students are assigned to the Program Director of Nursing and the advisor group. Students have a team to help ensure their success. Students retain responsibility for their own success through continual review of course and program progression, ensuring all required courses are completed in sequence. The program director of nursing's role is to review students' degree audit form at the beginning of each semester to ensure students are on track academically. The program director's role is also to help students assure the correct forms and applications needed for academic progression are completed and to provide information on academic progression to the UW ReNEW BSN program. The nursing program student success coaches assist students with questions on progression and financial aid assistance. The administrative assistance for the nursing program keeps track of required documentation and assists students with required clinical paperwork that ensures students stay in compliance for the clinical courses.

Office of Student Accommodation (OSA)

The Office of Student Accommodation (OSA) LCCC provides comprehensive, confidential services for LCCC students with documented disabilities. Services and adaptive equipment to reduce mobility, sensory, and perceptual concerns are available through the OSA, and all services are provided free of charge to LCCC students. Any student with a documented disability is welcome to contact the Office of Student Accommodations (OSA) as early in EACH semester as possible. No accommodations can be made until notification from OSA is received and acknowledged by the nursing program director and faculty. These accommodations need to be renewed each semester. It is the responsibility of the student to seek assistance and to communicate as directed with nursing faculty and program director to ensure appropriate accommodations are provided following OSA

approval. Students are expected to request accommodations with appropriate time to implement. Accommodations requested less than one week prior to examinations or major assignments may not be able to be implemented. Students must plan accordingly.

Website for OSA: http://lccc.wy.edu/services/disability/index.aspx

OSA Handbook: http://lccc.wy.edu/Documents/Services/disability/DSS%20Student%20handbook%202018_WEB.pdf

Exam/Assessment Testing Accommodations

Exams and Assessments in the nursing program can begin as early as the first week of the semester upon student request through the disability support services. Please note, students with exam accommodations are responsible for completing the requirements with OSA to ensure the accommodations are in place for the first exam/assessment. Students are expected to request accommodations with appropriate time to implement. Accommodations requested less than one week prior to examinations or major assignments may not be able to be implemented. Students must plan accordingly.   The nursing program will assist students in this process by reminding students of upcoming exams/assessments and remind students to submit OSA paperwork for exam accommodations to the program director of nursing. The exams/assessments will occur at the time indicated in the syllabus. Exam accommodations are available on the Cheyenne campus in the testing center only. Accommodated exams/assessments take place in the testing center in the Clay Pathfinder building room 119. Alternative testing sites off the Cheyenne college campus are not offered. In the event a student anticipates missing or does miss an exam/assessment appointment, it is the responsibility of the student to contact the faculty or OSA via instructed contact method (text message/email are not appropriate) and speak to someone as soon as is possible. Student will receive additional instructions from the faculty or OSA regarding examination.

Part 3: Nursing Program Policies & Procedures

Code of Conduct

Nursing is rated as the most highly respected profession in health care and patients identify nurses as the most trusted member of the health care team. With that understanding, nursing students assume an obligation to conduct themselves in a professional and civil manner and to comply with legal standards of the profession and the community. Furthermore, nursing students are also accountable for their own behavior and are expected to act in a responsible manner which reflects the qualities of honesty, courtesy, reliability and responsible interpersonal skills.

It is also the responsibility of any student who observes a violation of policy to report it immediately to the faculty and to promptly report to the faculty any student who poses a hazard to the safety and welfare of others due to a condition which impairs his/her ability to perform clinical duties. Conduct inconsistent with the Nursing Program and Health Science and Wellness School goals and policies may be subject to disciplinary action and dismissal from the nursing program.

The following professional behaviors provide expectations for conduct while in the nursing program and guidance for the nursing student in personal development of an ethical foundation and can assist in the holistic development of the person. Students are expected to comply with the policies for both the Health Sciences and Wellness School and Nursing Program while in the classroom, laboratory, and clinical settings. Repeated violations of expected behaviors may result in failure of the course, lab, or clinical and up to dismissal from the program.

Professional Behaviors

Professional Behavior (employability skills): is the conduct, aims, or qualities that characterize or mark a profession or a professional person. Each student is graded on professionalism throughout the program, including clinical setting. Students are expected to follow professional standards when in the classroom, skills lab, simulation lab, clinical settings and all interactions with nursing faculty.

Guidelines for these expectations are as follows:

1. **Attendance:** Attends class/clinical events regularly at scheduled times.

2. **Punctuality:** Arrives timely to learning experiences (including all class/clinical events).

3. **Appropriate Dress and Hygiene:** Complies with policies outlined in LCCC, HSW, and the Nursing Student handbooks.

4. **Citizenship:** Student displays honesty, civility, integrity, accepts and abides by LCCC, HSW, and the Nursing Program policies and procedures, accepts responsibility for errors.

5. **Time Management:** Uses time (including down time) wisely, completes all technical procedures begun, performs duties in an organized, efficient manner.

6. **Teamwork:** Displays a respectful manner to fellow students/faculty/administration. Pleasant to work with. Performs as a member of a team with team goal as an objective, willing and available to help others as needed.

7. **Customer Relations:** Respects the patient at all times, establishes rapport with patients/clinical partners. Maintains a helpful and courteous manner with all health care personnel, visitors, physicians, and peers. Interactions leave a favorable impression of the student/faculty/HSW/LCCC.

8. **Therapeutic Communication**: Communications with patients, family, faculty, peers, and health care personnel that convey acceptance and respect while maintaining a level of professional distance and objectivity. (Does not display profanity; defiance; derogatory/slanderous comments; violence/threat of violence; Judgmental behavior/statements, imposition of values and beliefs on others).

9. **Confidentiality:** Holds in strict confidence all information concerning patients, visitors, physicians, and peers.

10. **Receptiveness:** Receptive to suggestions and/or corrections, able to answer questions directly and honestly. Accepts constructive criticism in a positive manner.

11. **Safety:** Complies with appropriate policies and quality patient care is displayed as a priority at all times.

12. **Continuous Improvement**: Develops new and appropriate skills building on past learning, makes note of and learns from mistakes, strives to perform assignments to the best of his/her ability.

13. **Communication**: Able to follow directions, expresses ideas clearly and readily, uses respectful and professional language and tone in verbal and written communication and observes appropriate channels of communication.

14. **Skills Management:** Demonstrates continued competence in areas of past learning, retains and practices skills previously taught.

15. **Compliance:** Adheres to all clinical setting requirements, including but not limited to, asking permission before performing procedures and ensures all immunizations (including titers), CPR, TB test, and flu vaccine documentation are up to date for the length of the nursing program.

Civility

Civility comprises of a conscious demonstration of mutual respect for people, for their roles, for their knowledge and expertise. Civility requires cooperation, tolerance, acceptance, inclusiveness, kindness, courtesy, and patience. It is expressed not only in verbal and written words we choose, but in our demeanor, and actions. All nursing students are responsible for and expected to exemplify and promote civility. The LCCC nursing program is committed to creating and maintaining a positive learning and professional, working environment. While it is understood that disagreement will, and should, occur in the collegiate setting, open communication, intellectual integrity, mutual respect for differing viewpoints, freedom from unnecessary disruption/disparagement and a climate of civility are important values we enhance. (*Adapted from University Libraries Penn State University).

Personal Conflicts

Students with personal conflicts or problems not related to the program are encouraged to make a Care Team Referral at http://lccc.wy.edu/services/careteam/index.aspx and/or contact a college counselor by calling the counseling office at 307-778-4397 (main line). The counseling office is located in the Clay Pathfinder Building Room 207. Students are also encouraged to contact their nursing faculty mentor.

HIPAA

HITECH ACT of 2009 and HIPAA: All verbal, electronic, and written information relating to patients/clients and contracted agencies is considered confidential and is not to be copied or discussed with anyone or removed from a health care facility unless written permission has been given by the clinical agency to remove such information. Information may be disclosed only as defined in HIPAA guidelines for educational purposes. A breach of confidentiality will result in disciplinary action under the guidelines outlined in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P, which may result in possible failure of the course/program and may lead to immediate suspension and/or subsequent dismissal. (Refer to 14.e)

Confidentiality as Legislated by Health Information Portability & Accountability Act (HIPAA)
Confidential care and treatment are the right of all patients in all clinical agencies used for clinical experiences. The diagnosis, treatment and all other information concerning patients is confidential and may not be released to anyone, including family members, without the written consent of the patient following facility protocol. Even the presence or identity of a patient in an institution or their ability to pay their bill is considered to be confidential information.

The student will not at any time during or after clinical experiences, disclose or discuss confidential patient information or any part of the experiences which is of a confidential nature to anyone who does not need the information to perform their duties. A student cannot seek or obtain information regarding confidential matters, which is not necessary to fulfill responsibilities as a student, including information of friends or families.

Disclosure of confidential information may cause irreparable injury to an individual, LCCC and/or the clinical agencies, and may result in a civil lawsuit. Violation of this agreement or disclosure of any confidential information in an unauthorized manner can result in a student's immediate dismissal from the Program. If in any situation the student is uncertain or unclear of their responsibilities in protecting confidential information, the student will seek the guidance of faculty or appropriate supervising personnel.

Academic Integrity

Academic integrity is the moral code or ethical policy of academia. This includes values such as avoidance of cheating or plagiarism and maintenance of academic standards. Maintaining academic integrity involves: creating and expressing your own ideas in course work; acknowledging all sources of information; completing assignments independently or acknowledging collaboration; accurately reporting results when conducting your own research or with respect to labs; and honesty during exams/assessments (LCCC Administrative Procedure 2.16P).

Students are expected to maintain high standards of academic integrity including; completing assignments independently (unless authorized), reporting accurate results when conducting research, avoid cheating and plagiarism. A student's first offense will be handled by the instructor. Repeated documented violations will result in disciplinary action under the guidelines outlined in the Program Handbook and the Student Discipline Adjudication Procedure 3.16P, which may result in possible failure of the course and/or suspension/dismissal from the program.

Nursing students are expected to exhibit exemplary honesty and integrity. The Wyoming State Board of Nursing requires that all Wyoming Nursing Programs hold students accountable for these behaviors. This may be seen in the Wyoming Nurse Practice Act, Rules and Regulations, Chapter 6, Section 4 (e) Students: (ii) "The program shall hold students accountable for professional behavior, including honesty and integrity, while in their program of study. All policies relevant to applicants and students shall be readily available in writing". Be advised that nursing students may be held to a higher level of accountability as seen in the Nursing Student Handbook. Students are responsible for abiding by those policies.

Consequences for participating in any form of academic dishonesty may include receiving a failing grade for the assignment and/or course and/or being subject to suspension or dismissal from the program. This action may also lead to suspension or dismissal from LCCC pursuant to the LCCC Student Handbook. Students dismissed from the Nursing Program for Academic Dishonesty will not be allowed to be readmitted to the LCCC Nursing Program.
All LCCC students are expected to display appropriate conduct while on campus or attending college-sponsored activities. LCCC will take appropriate action for any demonstrations of academic dishonesty. Academic dishonesty is defined as a willful perversion of truth, or stealing, cheating, or defrauding in instructional matters.
Students will have engaged in academic dishonesty if they:

- Copied the work of another without attribution.
- Willfully allowed another to copy their work.
- Falsified information.
- Participated in unauthorized collaboration.
- Obtained an examination prior to its administration.
- Accessed an exam/assessment afterwards without faculty approval.
- Used unauthorized aid(s) during an examination/assessment.
- Knowingly assisted someone else during an examination.
- Submitted the work of another as though it were their own, or
- Committed other acts of plagiarism or actions deemed to be dishonest by the faculty.

Methods of Instruction

Today's nurses no longer rely on the ability to recall specific facts in isolation (traditional nursing education). Instead, nurses must learn to make sense of those facts and apply them to a variety of specific examples. The concept-based learning method recognizes that today's nurses need the ability to transfer knowledge from one bedside scenario to another by focusing on main ideas and teaching students how to categorize information. Concept-based learning challenges students to think more critically about new information by applying prior knowledge and experience. The key is to think beyond the facts and to connect facts to significant ideas (concepts).

To promote concept-based learning, a variety of approaches are utilized. While faculty act as resources and facilitators of the students' learning experience, it is the students' responsibility to successfully complete the outcomes/objectives of the course. These instructional approaches and evaluation methods include but are not limited to:

Student Presentations	Role Playing/ Problem Solving	Nursing Skills – Return Demonstrations
Discussions	Ticket-To-Class Assessments	Audio-Visual/Computer Based Exercises
Individual and Group Work	Standardized Web-Based Assessments	Reflective Exercises
Exams/Quizzes	Clinical Evaluation Tools	Writing Exercises

A key element for student success is preparation before lecture. Since concept-based learning requires students to have basic knowledge of the content prior to class, homework and preparation is essential. Students are expected to complete assigned preparatory activities in order to build foundational knowledge needed for application in class. Students also need to be prepared to engage in collaboration, team activities and to directly apply the knowledge being addressed in the classroom. Please note, extra credit opportunities are not provided in the nursing program.

Nursing Program Grading Policy

A minimum of 75% is required to pass any Nursing course. There is no rounding or extra credit provided at any point in the Nursing Program.

Grading Scale
    A. 90% -100%
    B   80% - 89%
    C   75% - 79%
    D   60% - 74%
    F   < 60%

Expectations
- Students are responsible to keep track of grades.
- Students are expected to take computer exams/assessments when scheduled. In the event the computer technology is not working, an alternative testing method and/or rescheduling of the exam/assessment at the earliest opportunity will be implemented. Students are expected to be flexible and accommodate unforeseen changes in the exam/assessment schedule.
- Students are expected to understand the criteria for evaluation and grading used in the nursing program and to ask questions if this process is unclear. The criteria for evaluation and grading used in the nursing program is provided to students during orientation to the course and are included in the course syllabus.

Theory Exam/Assessment Grades
- Students must achieve a score of at least 75% average weighted grade for the unit exam and final exam categories as identified in each course syllabus before remaining points (for example homework/classroom activities/quizzes) are added to the final grade.
- Students will complete unit and content specific exams/assessments within the ATI platform.
- Students will complete ATI assessments in addition to their exams within ATI.
  - Depending on the semester the student is currently enrolled affects the exam/assessment distribution and weight of grades. Students are responsible to review their course syllabi and ensure their understanding of grading configuration. Students are responsible to seek clarification from their instructors where it is needed.

Clinical Grades
- Students are required to achieve at least 75% average within the Clinical Evaluation Tool Category as identified in the course syllabus before the remaining points for the course are added to the final grade.
- Students must complete all required clinical expectations and assignments in order pass the course.

Syllabus Expectations

The course syllabus is available online in the Canvas course and will be reviewed on the first day of class. The syllabus represents the faculty's best judgement and projection of course content and dates. In order to fulfill educational outcomes, the syllabus may be modified at any time by faculty. Students are notified of changes to the course syllabus at the class meeting or through online announcements in Canvas.

Each semester, students are required to review the syllabus and clinical expectations and complete a Canvas quiz acknowledging receipt and awareness of and compliance with the information in the course syllabus. Students who do not take the required quiz are still accountable and held responsible for all content and updates in the syllabus.

Late Policy for Assignments/Exam/Assessment Submissions

To be eligible to receive full credit for Assignments/Exam/Assessment Submissions, the student must follow guidelines for completing assignments as outlined in the syllabus and/or by the instructor. Assignments/Exam/Assessment submissions are to be submitted to the faculty of the course on the date and time specified or examination/assessment deadline. <u>Even if an assignment is late, the Assignment/Exam/Assessment Submissions still is required to be submitted.</u> <u>All Assignments/Exam/Assessment Submissions must be completed to pass the course.</u>
- Late submissions result in zero points; however, completion is required.

- Students are provided the schedule of due dates during orientation to the course in order to provide students sufficient time to complete assignments.
- Accommodations may be made for unseen events and emergencies. The student must contact the faculty **in advance** to make arrangement for Assignment/Exam/Assessment Submissions.
- Clinical documentation due dates and times are determined by the respective clinical faculty.
- Institutional policies will be upheld.

Factors Affecting Grades:
- Class participation, quality of work, attitude, attendance and late Assignments/Exam/Assessment Submissions. Note: submissions incomplete by the designated date and time are considered late (see late policy).
- Students must complete all Assignments/Exam/Assessment identified in the syllabus, learning guide and posted on Canvas in order pass the course. Failure to complete and/or submit an Assignments/Exam/Assessment may lead to dismissal from the nursing program.

Ticket to Class:
Quizzes, assignments, etc., that demonstrate learning and competency essential to the class or clinical session may be required before class begins. Students may be restricted from class and/or clinical experiences without these items. Requirements for class participation will be outlined in the course syllabus and identified during course orientation.

Children in the Classroom:
Under normal circumstances, students may not be accompanied by children or other family members in the educational setting, including classrooms and labs. This action is intended to eliminate situations in which the extended presence of a family member may hinder the orderly functioning of the academic environment. Exceptions must be approved by the class faculty.

Assessment Technology Institute (ATI) Policy
- Students are required to take all exams/assessments and standardized tests as assigned. Failure to complete and/or submit an Assignments/Exam/Assessment as directed by course syllabus and the instructor may lead to dismissal from the nursing program.
- **NURS2400 Comprehensive Predictor (CP):** The 1st attempt at the RN Comprehensive Predictor is administered during the first few weeks of the semester. The CP determines how earlier tutorials and practice tests prepared the student for the NCLEX RN. The exam consists of 150 items – students are encouraged to plan ahead to be prepared for a lengthy assessment time. Students earning <100% of the possible pts on the first attempt of the RN Comprehensive Predictor can complete remediation, practice assessments, and focused review to earn additional points to increase overall possible points (not to exceed 100%).
- Students earning 95% predicted probability of passing the NCLEX on the Comprehensive Predictor Assessment -2nd Attempt are <u>excused</u> from the final exam.
- Students earning less than 95% predicted probability of passing the NCLEX on the Comprehensive Predictor Assessment – 2nd Attempt will be <u>required</u> to take the final exam.

Standardized testing & assessments (ATI): Achievement and Diagnostic Exams and Assessments

During the nursing program, students will be required to take selected achievement assessments including but not limited to NCLEX diagnostic, content area specific tests, ATI assessments, etc. and results may be incorporated into the student's grade. The results give students an indication of their strengths and topic areas which need additional study. Remediation may be required based on results. In addition to evaluating the students' progress and knowledge in the program, these tests assist in the overall program's evaluation. Appropriate program changes may be made based on test results and aggregate data may be used for research.

LCCC utilizes ATI as required content that supplements the curriculum. ATI assists in preparing students for the NCLEX exam by systematically strengthening their knowledge base throughout their nursing education. The nursing faculty strongly encourage students to engage themselves toward facilitating individual learning and test-taking skills. Students are encouraged to successfully achieve proficiency at faculty determined benchmarks in all ATI proctored assessments. Students scoring below the expected benchmark are expected to remediate according to faculty's directions and may be required to take the ATI assessment a second time. The program is designed to increase pass rates on NCLEX and at the same time assist students to pass the unit exams that are part of the nursing program. In fourth semester a live NCLEX review is provided by an ATI Nurse Educator.

Dosages Calculation Assessments

- Each semester students will take a medication dosages assessment. Students are expected to achieve at least 80% on the assessment on the first attempt.
- Students in courses unsuccessful on the first attempt may be eligible for a second attempt. The instructor will determine and direct required remediation in order for the student to be granted a second attempt. Conditions for a second attempt may include (but are not limited to):
  - Meet with nursing faculty to develop an academic PIP for second attempt.
  - Complete AND submit assigned remediation per instructor's direction.
  - Demonstrate at least 80% on 2 practice tests before attempting second dosage calculation assessment.

Dosage Calculation Assessment Course Specific Requirements:

- **NURS 1100**: students must achieve an 80% on the dosage calculation assessment(s) to be able to administer medication in the clinical setting and meet the required outcomes of the nursing course. Failure to achieve 80% after the 3rd attempt on dosage calculation assessment 2 will result in dismissal from the nursing program.
- The first score will be recorded in the Canvas gradebook regardless of the number of attempts.
- Students have up to 3 attempts to achieve 80% on the dosage calculation assessment. Failure to achieve 80% after the 3rd attempt will result in dismissal from the nursing program.

- **NURS 1200, NURS 2300, NURS 2400**: Students must achieve an 80% on the dosage calculation assessment(s) to be able to administer medication in the clinical setting and meet the required outcomes of the nursing course. Students will lose points on the daily clinical evaluation tool each day in clinical they are unable to pass meds due to not passing the assessment.
- The first score will be recorded in the Canvas gradebook regardless of the number of attempts.
- Students have up to 2 attempts to achieve 80% on the dosage calculation assessment. Failure to achieve 80% after the 2nd attempt will result in dismissal from the nursing program.

Return Demonstrations:

Students are required to successfully perform return demonstrations with an "S" in order to participate in clinical rotations throughout the program. Skills demonstrations are outlined in the syllabi or learning guide and provided within the Canvas shell. Each student is given time in the lab sessions to learn each skill and practice skills prior to demonstrating for a member of the nursing faculty. If the student is unsuccessful performing a return demonstration for a skill, the instructor will determine and direct required remediation in order for the student to be granted a second attempt. The second attempt will be granted based upon the successful completion of instructor determined and directed remediation. The second attempt will not occur on the same day as the first attempt, nor will it be observed by the same faculty member. The student maintains responsibility to make an appointment on their own time that is convenient to the assigned member of the nursing faculty. This faculty member will be designated by the instructor and program director. Should the student not be successful with the second attempt of return demonstration, the student will be ineligible to progress in the semester's nursing coursework, regardless of the didactic coursework grade, and will be dismissed from the program.

Exam/Assessment Policy

1. Students are expected to bring their personal laptop, or tablet to take the exam/assessment.
2. Exams/Assessments will take place in the same classroom as the theory course unless directed by nursing faculty/program administration, or accommodated by OSA.
3. Once the password for the exam/assessment is given to the students, the exam/assessment officially starts.
4. If a student arrives after the exam/assessment has started, student is responsible to check in with faculty for admission and further instruction.
a. Students given permission to take the exam/assessment once it has started must complete the exam/assessment by the originally expected end time.
5. Students are expected to begin the exam/assessment at the scheduled start time, including students testing in the exam/assessment lab.
6. Students arriving after the exam/assessment is completed, are unable to sit for the exam/assessment and will receive a 0 grade.
7. Students who need to use the restroom must check with the proctor before leaving the room.
8. Calculators, paper or white boards will be provided. One sheet of scratch paper is provided per student in alignment with ATI, NCLEX testing policies.
9. Seating is based on first come, first served, no "saving seats".

10. After completion of the exam/assessment, students are expected to remain in their seats and raise their hand to signal for the proctor to observe student closing down the web browser before leaving the exam/assessment room.
11. No hallway conversations during or after testing. Students completing their exam/assessments are to leave the building immediately following. No loitering. Students may wait in designated student lounge areas for carpool mates but may not linger in the hallway.
12. Students are not to access any exam/assessment after leaving the exam/assessment room. Doing so, will result in a grade of zero on the exam/assessment.
13. Exam/assessments are completed on the Cheyenne campus whether in the assigned classroom or for students with DSS accommodations in the exam/assessment lab in the Pathfinder building.
14. To receive points for exam/assessments students must upload a screenshot of their exam/assessment score into the drop box posted in **CANVAS by 1630 the DAY OF the exam/assessment** (unless otherwise directed by the faculty). Failure to upload the screen shot of the examination/assessment by the due date/time will result in a 0 (zero) on the exam/assessment.
15. Students, who are verified as cheating, will receive a 0 (zero) on the exam/assessment and may be subject to further disciplinary procedures up to and including dismissal from the nursing program.
16. No extra credit or remediation is offered for the improvement of unsatisfactory unit/final exam scores.

Exam/Assessment Security Procedures
- **Leave all personal items in the car.** To include, but not limited to: headwear (hats, hoodies, scarves, headsets), bags, backpacks, phones, smart watches, etc. You may have one car key on a key ring.
- **Clothing:** no hoodies or jackets. If student arrives in prohibited outerwear, students may be asked to wear a **LCCC t-shirt and return it back to faculty after the exam/assessment.**
- No cellular devices, personal items, or personal electronic devices in the testing room. This includes smart watches, Fitbit, candy, etc.…
- Clear water bottles only allowed in the testing environment. Clear includes no labels or writing on the bottle. Exception may be allowed by the faculty PRIOR to the exam/assessment start.
- Hard candy/cough suppression lozenges may be allowed per faculty/proctor discretion. PRIOR permission required.
- The faculty has the discretion to request examination of loose clothing and/or request that a student change.

Missed Exam/Assessment Policy
- If a student is unable to take an exam/assessment, they must notify the course faculty at least **2 hours prior** to the scheduled exam/assessment. Students are required to request permission to take a make-up exam/assessment from the program director of nursing. Reasons for a make-up exam/assessment include but not limited to illness with a doctor's note, death in the family, and extenuating circumstances. Extenuating circumstances will be evaluated by the faculty and program director and make a final determination. If a makeup exam/assessment is permitted, an alternative exam/assessment to enhance exam/assessment security may be given.
- Students will be required to complete an exam/assessment integrity form and achieve approval by the program director.
- Students will be required to upload a screen shot of their exam/assessment score to CANVAS as directed by the faculty.

Test Review
- Students are encouraged to review each unit exam/assessment. Students have up to 2 weeks following the unit exam/assessment date to schedule a time to review the exam/assessment.
  - Exam reviews WILL NOT include specific exam questions. During these reviews faculty and student may discuss concepts, sticking points, and remediation recommendations. Test specifics are proprietary and a matter of academic integrity. As such this will not be shared from faculty to student or vice versa.
- The final exam/assessment is available for review up to 2 business days following the exam/assessment date.
- If an optional group test review is held:
  - No tape recordings, pictures or other electronic capture will be allowed during the review.
  - No electronic devices will be allowed during the review. This includes cell phones.
  - No copying of questions. Written, electronic or otherwise.
  - Notes must be approved by faculty prior to leaving the review site.

Challenging Test Questions
- **Unit exams**: Students desiring to challenge a test question answer are expected to meet with the appropriate faculty within seven business days after the exam is reviewed with the faculty.
- **Final Exam**: Students desiring to challenge a test question answer are expected to meet with the appropriate faculty within 1 business day after reviewing the exam with the faculty.
- Faculty will not respond to discussion of test questions by email. Students need to make an appointment.

- Students are expected to provide in writing the rationale for the proposed alternative answer, including two scholarly sources to support the alternate answer.

Testing Procedure in Case of Natural Disaster/Sickness/Unforeseen Circumstance

In the event of a natural disaster/sickness/college closure/unforeseen circumstance or an event where a large group of students are unable to test, the originally scheduled exam/assessment will be cancelled and rescheduled. Students will be notified of the change in exam/assessment test date and are expected to adjust their schedule to accommodate the change in exam/assessment date. The disaster must be unique and unforeseen. It is not to be used for normal, recurring events such as snowstorms, inclement weather, car trouble, etc.
(Reviewed 1/2024)

Testing Online
In the event unit exam/assessments and/or the final exam must be taken online the following policy will be used:
Students will be taking the remaining proctored exam/assessments (i.e. unit theory exams, theory final exam, ATI assessments, etc.) online in students' homes. To ensure the integrity of the examination/assessment and that no student may have an unfair advantage over other students, the online examinations/assessments are monitored by Lock Down Browser and MONITOR. Additional monitor proctoring may be required by the assessment platform used. Instructions will be provided by the faculty and program director.

Getting Started
1. Students are expected to use their personal laptop and webcam for each exam/assessment.
2. Each student must undergo an initial identification check, face recognition and conduct an environmental scan prior to gaining access to the exam/assessment.
3. Exam/assessment window- students must start their exam/assessment within 30 minutes of the start of the exam/assessment window.
4. Initial identification check - students must present either their LCCC ID or a state identification card during the ID verification process. The name must match the full name you use in your LCCC account.
5. Initial environmental scan - before gaining access to exam/assessment questions, all students are expected to conduct an appropriate environmental scan (by scanning the area around her/his computer to verify that it is free of materials or people that may provide an unfair advantage to the student) and must include all of the following:
   - the desk/work-space
   - a 360-degree view of the complete room
   - Slow, deliberate, and systematic scans to allow for a clear view of the entire exam/assessment environment
6. During the exam/assessment, students are required to maintain a secure exam/assessment environment by conducting the following actions:
   - Keeping full face, hands, workspace including desk, keyboard, monitor, and scratch paper, in full view of the webcam
   - Not leaving the exam/assessment environment, unless a 3-minute bathroom break is permitted by the faculty. In this circumstance, the video must be left open and running and any scratch paper must be left at the computer. Otherwise remain in the originally scanned exam/assessment environment for the entirety of the exam/assessment.

The computer used to take the assessments/unit exams
1. The computer you are using to take the exam/assessment must not have more than one display or monitor. For example, if you usually use a laptop with a monitor connected, disconnect your monitor and use only the laptop screen.
2. You must close all other programs or windows on your testing computer before you begin the exam/assessment.
3. You must not use the following tools:
   - Programs such as Excel, Word, or PowerPoint.
   - Communication programs such as Skype.
   - Any website page other than the exam/assessment window in your course.

Expected Testing Behavior
1. You must dress as though you were taking the exam/assessment in the nursing program classroom (street clothes, no hoodies, or other prohibited clothing, see student handbook).
2. You must not use headphones, ear buds, or any other type of listening equipment.
3. You must not communicate with any other person by any means.
4. You must not use a phone for any reason.

Test environment rules

1. You must take the exam/assessment in the same room that you scanned during the proctoring setup for the current exam/assessment.
   Note: You must complete a webcam scan of the room where you will take the exam/assessment every time you take a proctored exam/assessment. However, you do not have to take all of your proctored exam/assessments in the same room.
2. No other person is allowed to enter the room while you are taking the proctored exam/assessment.
3. A well-lit environment in which the student's full face, including eyes, are in view of the webcam at all times (avoid backlight from a window or light source located directly opposite the placement of the camera).
   - The lighting in the room must be bright enough to be considered "daylight" quality. Overhead lighting is preferred. If overhead lighting is not available, the source of light must not be behind you.
4. The room must be as quiet as possible. Sounds such as music or television are not permitted.
5. Media devices are not allowed while the student has access to his/her exam/assessment (including cell phones, tablets, smart watches, monitors, gaming consoles, etc.).
6. No other background computer programs are running.
7. A workspace that is a hard surface, free of any clutter, reference materials, and other electronic devices. The following items must not be on your desk or used during your proctored exam/assessment:
   - Books
   - Textbooks
   - Notebooks
   - Phones
   - A bed is not an appropriate exam/assessment environment
   - The desk or walls around you must not have any writing or stickie notes.
   - One blank sheet of 8.5 by 11" paper that has both sides visible and presented to the camera during room scans is acceptable. The scratch paper may be used for notes, calculations, etc. Scratch paper must be properly destroyed (tearing the scratch paper in small 1" pieces) in front of the webcam after exam/assessment.

Additional time or special allowances

If you have a disability and need additional time or specific accommodations to take the exam/assessment, current recognized OSS exam/assessment accommodations for students will be honored for the online exam/assessments. If additional time allowances or accommodations are in place, student must exercise those under the direction of the exam lab in designated spaces. Extended time for testing will not be proctored in the regular classroom environment.

Consequences of Rule Violations

Following the conclusion of an exam/assessment, each student's performance is assessed for any abnormal behavior and a report is submitted to each course faculty. The faculty will review the report provided by Lock Down Browser and the video recording. Any indications of a student subverting the testing process is subject to disciplinary action up to and including a 0 grade and/or dismissal from the program.

Program Progression

In order to remain and progress in the nursing program, students are expected to:
- Maintain acceptable background checks/drug screens/clinical clearance throughout the nursing program, and during all program related activities.
- Maintain up to date clinical clearance documentation in document storage system as directed.
- Maintain the LCCC, HSW, and Nursing Program standards of student conduct.
- Achieve a "C" or better in all courses required to complete the Associate Degree in Nursing (ADN) in the order listed in the nursing program student handbook.
- Achieve at least a 75% average or better on the clinical evaluation tool in all nursing courses.
- Achieve at least a 75% average weighted grade for all unit and final exams.
  - General & Co-requisite education courses must be completed successfully prior to or within the semester curriculum plan to progress to the next semester. If the student has not completed these courses with a grade of "C" or better, the student will not be able to progress in the nursing program until the course is repeated with a passing grade. Once the student has completed the course with a "C" or better, the student can petition to re-enter the nursing program.

Unsatisfactory Performance

Student misconduct, whether academic, clinical or behavioral, is in direct conflict with the principles and philosophy of the nursing profession. Student misconduct of any type will not be tolerated as it lowers the standards of nursing practice, and consequently jeopardizes the safe provision of client care, affecting the lives and well-being of the public.

Unsatisfactory Academic Performance:

- Unsatisfactory performance on examinations can be determined before or at midterm and/or after two exams scores less than 75%:
  - Students with a midterm grade equal to or less than a 75% average weighted exam grades will be sent a letter via LCCC email of academic performance and include the following information:
    - Request to meet with nursing faculty on a scheduled basis as determined by the faculty and/or program director. Student is expected to follow faculty determined timeline, frequency, and meeting requirements.
    - Notification of student's current academic status and possible course failure.
    - Resources for student success to assist students to successfully complete the course.
    - If applicable, a reminder of course withdrawal date as stated in the individual course syllabus, as well as the consequences of course failure.
    - Students unsuccessful at midterm and/or after two exams scores less than 75% will be placed on a performance improvement plan for academic performance.
  - Students who are unsuccessful achieving an 80% on dosage calculation assessments on the first attempt will be placed on a performance improvement plan for academic performance.
  - Students who are unsuccessful achieving minimum 50% probability of passing NCLEX-RN on the first attempt of the ATI-CP.
- At the end of each semester:

  - Students have the option to review the content of the final exam following the same process for reviewing unit exams with the exception that students have **2 business DAYS** from the date of the final exam to review the final exam.

- o If a student has not achieved the required minimum grade of a 75% average in all weighted exam categories identified in the syllabus and/or does not achieve a 75% average on the clinical evaluation tool, a failing grade will be entered as the final grade in both Canvas and Self Service.
- o Final grades posted in Self-Service that are less than a "C" will receive a letter within 7 business days from the day the grades are required to be posted in Self-Service from the nursing program notifying them of their dismissal from the nursing program.

Unsatisfactory Clinical Performance/Conduct:

Students are notified of deficiencies through the clinical evaluation tool and/or other tools used to assess student performance, professional behaviors and expectations in the clinical course. Students will meet with the clinical faculty, clinical coordinator and program director of nursing as needed to determine the student's status and continuation in the course. This decision is based on the student's ability to meet the course outcomes and provide safe client care. Students may be subject to additional disciplinary action depending on situation up to and including dismissal from the nursing program.

Unsatisfactory Conduct:

- In the event that conduct concerns are identified by faculty, program director, or clinical partner, the student will be notified. Depending on the severity of the situation, student may be asked to leave the learning experience and/or placed on suspension until such time as appropriate action can be taken. Student may be required to meet with faculty, clinical coordinator, and/or program director or both to discuss unsatisfactory conduct that is in violation of the nursing program student handbook, HSW, LCCC, or clinical facility policies. Faculty, program director (as needed) and student will collaboratively address areas of concern and identify future expectations. As needed, formal documentation of next steps will be provided through a written Behavioral Performance Improvement Plan (PIP).

- **Performance Improvement Plan (PIP):** is a written warning identifying either a pattern of unsatisfactory conduct or a single violation of the nursing program student handbook, HSW, LCCC, or clinical facility policies. Students are required to meet with faculty and/or program director to discuss identified unsatisfactory conduct and collaboratively develop a PIP to correct identified area(s) of concern. The faculty and/or program director will include other faculty as appropriate in the meeting. Faculty will maintain the document in SharePoint and the student will be given either a digital or paper copy. The PIP will outline the student's unsatisfactory conduct with specific references to HSW, Nursing program and LCCC policies, rules or regulations allegedly violated with a specified timeframe for follow up. The student's signature on the PIP is not required in order for the PIP to be in effect. Faculty and/or program director may determine the need for further disciplinary action which may include probation, suspension or permanent dismissal from the nursing program.

Suspension/Probation

Students who fail to comply with the Nursing Program, HSW, or LCCC, clinical partner policies and procedures will be contacted by faculty and/or the program director for nursing to meet to formally address issues of non-compliance. Students who demonstrate behaviors or practices harmful to patients, themselves or others, will be placed on immediate suspension from the nursing program until the proper and necessary steps can be taken to meet with faculty and/or program director and all issues of concern are resolved. These absences are unexcused and the student will receive 0 (zero) points for the assigned experience. Failure to respond to requests to meet with the faculty and program director will result in continued suspension from the nursing program up to and including dismissal from the program.

- Students placed on suspension **will not** be allowed to attend nursing classes, clinical learning experiences or other nursing program activities until the issues are resolved. Examples of behaviors that can result in suspension include but are not limited to:
  - o Students who present an immediate danger to themselves, clinical clients/facility staff, other students, or themselves while in the classroom, clinical or lab setting.
  - o Failure to comply with Nursing Program, HSW, or LCCC, clinical partner policies and procedures.
  - o Failure to respond to requests to meet with the faculty and program director.

Withdrawal Procedure

Procedure for withdrawing from the nursing program:
- Student will submit a formal notification to the program director of nursing of the intent to withdraw.
- Students are expected to withdraw by the LCCC posted withdrawal dates.
  - o Withdrawal dates are posted on the LCCC.wy.edu website and in each course syllabus and posted in the Canvas course shell.
- Students are responsible for financial aid/business office obligations.

- Students desiring to re-enter the nursing program will follow the Re-Admission Application process outlined in the nursing student handbook.
- Students have a right to appeal an academic process. Follow the guidelines below and LCCC Academic Appeals Procedure 2.16P.

Dismissal

Reasons a student may be dismissed from the nursing program may include but is not limited to:
- Failure to meet academic course requirements.
- Failure to meet clinical course requirements.
- Failure to satisfy unsatisfactory performance contracts (PIP, Conduct, Suspension/Probation, or behavior contracts).
- Behaviors that endanger patient safety and well-being and violation of safety standards in the clinical course.
- Infractions of clinical agency policy or code of conduct.
- Violations of confidentiality.
- Fraud or deceit.
- Violation of the code of conduct and professional behaviors.
- A violation of the Nursing Program, HWS, LCCC Professional Conduct/Confidentiality Policies.

Students not eligible to re-enter the nursing program:
- Violation of the Nursing, HSW, LCCC Code of Conduct Policies.
- Inability to meet School of Nursing Program, HSW Performance Standards or clinical accessibility requirements.
- Incomplete PIP.
- Unsuccessful completion of two semesters in the nursing program OR one failed completion of a nursing program outside of LCCC and one failed semester in the LCCC nursing program.
- Students who have been out of the nursing program greater than one semester without documented program director approval or absence from the program resulting from failed program progression.

Grievance Procedure
- Student's rights to due process and the grievance procedure at LCCC level are described in the LCCC Student Handbook, available online.
- Due process for student concerns within the nursing program is outlined below:
  - Follow the Chain of Command:
    1. Approaching the individual directly involved in the concern using effective communication skills. If unresolved,
    2. Contact the Program Director of Nursing. If unresolved,
    3. Contact the Dean of Health Science and Wellness. If unresolved,
    4. Following LCCC grievance procedure as outlined in the Student Handbook.
  - Failure to follow LCCC policy and procedure in regards to grievance policy or any others may result in students request not being considered.

Communication Policy

- Student concerns/complaints regarding the program should be first addressed with the program director of nursing.
  - Concerns brought to the program director's attention may be taken to the faculty and/or LCCC administration.
- Student concerns/complaints about the program director of Nursing should be first directed to the program director and if unresolved should be directed to the dean of the health science and wellness (HSW).
- Complaints will be documented, including the projected outcome, and kept on file at the program facility. In all cases the Dean of the HSW School and the Dean of Students will be notified.
- Students have the right to appeal a student discipline process or sanction imposed on them. Follow the guidelines in the Nursing Program Handbook and the Student Discipline Adjudication Procedure 3.16P.
- Students have a right to appeal an academic process. Follow the guidelines below and LCCC Academic Appeals Procedure 2.16P.
  - For concerns/complaints regarding specific courses, students are expected to meet with faculty and review committee (as needed) which will be scheduled **prior** to the end of the semester.
  - During this meeting, the student is expected to:
    - Ask for an explanation of their grades if they do not understand how the grades were assigned.

- Discuss how the grade they received was arbitrary following the definition in the Academic Appeal Procedure 2.16P (see below).
  - A grade of arbitrary is defined as:
    - *A course grade assigned on some basis other than performance in the course.*
    - *A course grade assigned by resorting to standards different from those that were applied to other students in that course.*
    - *A course grade assigned by a substantial or unannounced departure from the faculty member's previously articulated grading standards.*
  - Note students in the nursing program would need to demonstrate that their final grade was determined by a standard other than the 75% average for weighted exam categories that is posted in the syllabus and handbook.
- After the meeting, the faculty has 7 business days to notify the student of the final decision via official LCCC email.
- Within 7 business days after receiving the faculty's final decision, the student can choose to submit to the program director of nursing a completed written academic appeal form addressing how the grade was arbitrary as defined in Policy 2.16P.
- The program director of nursing will collaborate with the Dean of Health Science to render a written decision via official LCCC email within 7 business days of receipt of the academic appeal form.
- If the student wishes to further pursue the appeal process, the student must contact the office of the Vice President of Academic Affairs via LCCC email and/or phone and request a review of the appeal within seven (7) business days of the school dean/program director's decision.
- The VPAA will convene the Grade Appeal Review Committee. This Committee will evaluate the academic appeal based on relevant information provided by all parties involved and will make a recommendation to the Vice President of Academic Affairs (VPAA). The Committee may recommend upholding the program director/school dean's decision or forward the appeal for review to the VPAA (or designee) - providing supporting rationale for the recommendation made to the VPAA within ten (10) days of the appeal submission.
- The VPAA and/or designee will make the final decision within seven (7) days of the Committee's recommendation and notify the student via official College email.
- The academic appeal process can take up to 45 business days from the date of the initial meeting with the faculty for a final decision.
- Complaints regarding Accreditation of this program should be addressed to the Accreditation Commission for Education in Nursing (Formerly NLNAC, National League for Nursing Accrediting Commission, INC.) (ACEN) (2011) 3343 Peachtree Road, NE Suite 850 Atlanta, GA 30326P: 404-975-5000 F: 202-975-5020.

Canvas & Email Communication

Students are expected to set up their Canvas notifications to immediately alert them of announcements. The LCCC email is the official method of communication between students and the nursing program. Important information such as advising and a student's status in the program is communicated in this manner. It is the student's responsibility to respond to email notifications within 2 business days. See also communication expectations under Exam Testing Accommodations, Clinical Expectations, Grievance Procedure for additional communication policies.

Class/Clinical Cancellations

As a student of LCCC you are automatically signed up for emergency notifications via MyLCCC.com. Should LCCC cancel classes due to bad weather, you will be notified on the following TV and radio stations:
- TV Channel 5 and College Channel 11.
- KRAE 1480 AM.
- KFBC 1240 AM
- KLEN 106.3 FM
- KRRR 104.9FM
- KOLT 100.7 FM

Change of Name or Address

The student is responsible for notifying both the nursing office and the records office at LCCC of any changes in contact information. For semester one, two, and four, a student's address is used to determine clinical site placement. Students who do not update their contact information may be assigned to a clinical site outside of their address area. (A student now living in Cheyenne maybe assigned to a Colorado clinical site based on their "current" address.)

Social Media & Personal Electronic Devices

As a representative of the Laramie County Community College Nursing Program, students are held to a high standard of professional conduct, including via social media. Students are prohibited from posting information pertaining to classroom, laboratory, simulation, and clinical experiences on social networking websites or any other type of internet, computer, or technology-based social networking site, or equivalent media outlet.

Personal electronic devices (PEDS): pagers and cellular telephones must be turned off and out of sight during lectures, labs and in clinical settings (such as any direct patient care areas, including patient rooms, dining rooms or therapy settings) <u>unless faculty approval has been provided.</u> Any personal electronic device in sight may be confiscated by the faculty and kept until the end of the day's activities. Any response to a PED must only be completed during break. Students are sometimes granted alternative access to faculty based on faculty discretion. This access is a privilege, and is expected to be managed in strict accordance with faculty instruction. Failure to follow the expectations for communication with faculty will result in loss of this privilege and may result in further disciplinary action.

The use of laptops and tablets are expected in the classroom and clinical setting. However, students are not expected to use these devices in patient care areas or during class to check personal email, "surf the internet" for non-class related topics or otherwise use the personal electronic devices for other than classroom involvement and participation. Any use of a personal electronic device during quizzes, tests, exams, assessments and other academic activities will be construed as cheating and treated accordingly. Violation of this policy is grounds for disciplinary action up to and including dismissal from the program.

At no time may students use a PED to take photographs, video or voice recordings of any patient or any part of a medical record or other protected health information. Additionally, students are NOT permitted to video record, voice record, any lecture/learning experience without express permission from providing faculty. Violation of this policy is grounds for immediate dismissal.

(Revised. 2024)

Attendance Policy

Classroom Attendance Policy

Punctual attendance is required for student success. Regular and timely attendance and punctuality is expected as a demonstration of professional behaviors. Failure to comply with established policies and procedures may result in disciplinary action, including potential dismissal from the program. Please note, LCCC does not have an excused absence policy for students who contract COVID-19.

Guidelines for pre-lecture assignments and classroom activities:

- Unless pre-arrangements have been made with faculty (at least 1 hour in advance), students who are absent for a theory lecture, will receive 0 points for homework, ticket to class or other assignments associated with the missed class lecture. If students completed the assignments and points were awarded prior to class, the grade will be changed to 0 points.
- Unless pre-arrangements have been made with faculty (at least 1 hour in advance), students need to be present and ready at the start of the activity in order to receive points. Students arriving after an activity has begun will not receive points, even if they complete the activity.
- Non-attendance at any nursing program learning event including but not limited to class, field trip or event may result in a lowered grade.
- Students who are absent cannot make up points for missed quizzes and/or in-class activities/assignments, and it will reflect as nonadherence with expected professional behaviors and code of conduct.

Guidelines for remote attendance:

- Students must request and receive confirmation of permission to attend remotely prior to each session (**at least 1 hour in advance of the session**). If a student is granted permission to attend remotely, the student is expected to participate via video/voice technology (skype, zoom, facetime, etc.) <u>as directed by the approving faculty or designee.</u> Students are expected to engage fully in classroom activities, and faculty led discussions and activities. Due to the nature of active learning that occurs in the classroom, each individual course faculty will determine if in-class points will be awarded and define expectations for participation and determine whether the student participated sufficiently to receive points. The faculty decision is final.

- If student is requesting remote attendance for illness, isolation/quarantine requirements, other unforeseen circumstances, student may be required to provide documentation to instructor of illness and any additional instructors/physician orders received. Failure to provide this documentation may result in student inability to participate in remote attendance, achieve points, or be granted make up assignments for the session missed.
- In accordance with nursing program policy, student attendance is critical for success in the nursing program. Should students begin to miss more than 1-2 sessions, student may be required to faculty and/or program director for the collaborative development of a PIP to ensure student success. Students are expected to remain in consistent, professional communication with their instructors and follow subsequently provided guidance.

Clinical Attendance Policy

Punctual attendance is required as a demonstration of professional behaviors and is expected for all clinical learning experiences. Clinical experiences may include but are not limited to:
- Orientation to the clinical course
- Clinical site rotations
- Preceptor and alternative rotations
- Skills lab rotations
- Simulation experiences
- Scheduled presentations
- Seminars
- Clinical site orientation

Successful attendance includes the completion of any and all site-specific requirements including pre and post conference, assignments, tasks, etcetera.
(Revised 1/2024)

Punctuality Expectations (applies to ALL Class/Clinical Experiences):
- Student is ready and prepared to fully participate in the learning experience prior to the expected start time.
- If a student arrives after the start time of the learning experience, points will be deducted in course participation points or on the Daily Clinical Evaluation Tool in accordance with the course policy.
- If a student is late to any learning experience, the faculty may send the student home. Points will also be deducted from Professional Behavior criteria on the next completed clinical evaluation tool.

Punctuality Violations:
- The first time a student is late (including 1 minute late to a learning experience including virtual, lab and simulation experiences) will result in the loss of points on the weekly/daily lab and clinical evaluation tool.
- After the first late arrival to any learning experience, students will receive 0 (zero) points on the weekly/daily lab and clinical evaluation tool and may result in disciplinary action. The faculty may send the student home or allow him/her to remain and participate, depending on the situation.

Absence Policy

- No makeup days are available for missed learning experiences.
- A student may be required to provide a doctor's note for any missed learning experiences.
- Reasons to be absent from a learning experience include but are not limited to: personal illness or illness of family member student is caring for. Students are responsible to manage these circumstances by communicating with their faculty in a timely manner and following subsequent instructions. If a student arrives to a learning experience ill or injured not having communicated with an instructor, potentially exposing other students, faculty, and most importantly patients/clients to illness or harm, the student will be sent home and professionalism points will be deducted. Additionally, the student may be required to meet with the program director to discuss professionalism and conduct concerns. Absences due to medical conditions and/or serious personal issues will be reviewed on an individual basis. Please note, LCCC does not have an excused absence policy for students who contract COVID-19. College mechanisms for due process are preserved (see current LCCC College Student Handbook for a complete description of student rights and responsibilities).
- An absence demonstrates unprofessional behavior and may result in disciplinary action. Examples include but are not limited to: using a "free day," studying for exams, completing assignments, needing to work, lack of daycare, being out of compliance with immunizations, and the last day of clinical.
- Students who are absent from **any learning experience**, will receive 0 points for the missed day and any assignments or activities that were assigned for that learning experience day including but not limited to pre-clinical prep, quizzes,

homework, or Ticket to Class, and group presentations. If students completed assignments and points were awarded prior to the learning experience associated with the absence, the grade will be changed to 0 points.

- If a student misses a skills lab experience, the student is required to demonstrate the missed skill(s) competencies and may lose performance points in the clinical setting for each day the student is unable to perform an expected skill. Students are required to contact faculty to receive additional instructions and schedule a time to demonstrate missed competencies.
- If a student is absent from any scheduled learning experience during the last 2 weeks of scheduled learning experiences for the semester, a primary care provider's written excuse may be required. Completion of a special written assignment may also be necessary. The assignment must be completed and submitted to the designated faculty by the specified due date. Extenuating circumstances (i.e. death in the family, accident, etc.) during the last week of the semester will be evaluated by the program director and faculty on an individual basis.
- Missed points due to an absence may impact student's grade in the course.
- After the first absence students may be placed on a Performance Improvement Plan (PIP) in order to facilitate the professional behavior of attendance and prevent future missed learning experiences.
- Failure to comply with established policies and procedures may result in disciplinary action, including potential dismissal from the program. Students may also be administratively withdrawn from the nursing program in the case of excessive absence and/or inability to meet course outcomes.

Absence Violations

- An absence violation occurs when a student does not call and does not show up for a learning experience or faculty sends a student home from a learning experience. The student will receive 0 points on the clinical evaluation tool for that day or in participation and will meet with the faculty and program director as needed for unsatisfactory performance.
- Reasons a student may be sent home include but are not limited to:
  o Student is unprepared for the learning experience.
  o Student demonstrates unsafe behavior.
  o Student is excessively fatigued – for example student worked the night shift prior to scheduled learning experience. Note: students are not to work the night shift prior to the start of the clinical experience.
  o Student is under the influence of any substance.
  o Student is ill/injured/incapable of fully participating safely.
  o Student demonstrates repeated inability to implement theory into practice.
  o Student fails to meet the list of critical behaviors.
  o Student arrives to the learning experience more than 7 minutes after the start time.
  o Student is out of compliance with clearance requirements.

How to Notify Faculty of Absence – the Process:

- Notify the faculty at least **1 hour prior** to learning experience:
- Students must have direct communication with the faculty by calling the faculty's cell phone at least 1 hour prior to the start of the learning experience. If the faculty does not answer, leave a voicemail message.
  o **Students are required to have their faculty's cell phone number readily available at all times (i.e., programmed into phone).** Students must not rely on their peers to notify the faculty. Such behavior is unprofessional and my result in disciplinary action.
  o Email notification and texting is not an acceptable form of communication for informing a faculty of a learning absence and may result in disciplinary action for unprofessional behavior. *****Exception:** The faculty has posted in Canvas a learning expectations document that includes permission to text as acceptable forms of communication.
- After leaving 2 voicemail messages, at least 10 minutes apart, and the student has not been able to establish contact with his/her faculty, the student can contact the Clinical Coordinator and inform him/her of the situation.

Absence Considerations During Nursing Program

Excused absence, extended or leaves of absence may be granted to students experiencing medical emergencies, pregnancy, adoption, death in the family, military leave, other disability-related factors on a case-by-case basis. It is the responsibility of the student to communicate with their faculty, clinical coordinator, or program director as promptly as possible should circumstances warrant.

Depending on the timing in the semester of the individual circumstance and/or desired amount of time needed, it may be possible for the student to continue without incurring unexcused absence(s) or requiring a leave of absence. The feasibility of this options is dependent upon certain deciding factors. These factors include but are not limited to:

- Student current standing and performance within the course
- Appropriate communication with necessary parties including:
  - Faculty
  - Clinical Coordinator
  - Program Director
  - Disability Support Services (Office of Student Accommodations)
  - Preceptor and clinical site (fourth semester only)
- Physician orders
- Amount of time requested by the student
- Feasibility of completion of course/program requirements
- Time of year of the program in which the absence will occur

Faculty, the clinical coordinator, and the program director review each circumstance on an individual basis with student and support services, when appropriate, to determine course of action and continuation plan. Title IX and ADA rules will be applied, when applicable.

Depending on the circumstance and length of absence required, a course continuation plan may be created including either continuing the current course, when able, or withdraw from that course when necessary. The continuation plan will include input from the Course Faculty, the Clinical Coordinator, and the program director who will meet with the student to review the components of the plan. Should withdrawal be deemed necessary, admission to the next course offering and/or the following semester may be granted pending space availability.

Considerations for continuation will include: The student's good standing in the course; absence of active or repeated performance improvement plans (PIP); and probability of continued and future success. In this case, the student will rejoin the appropriate cohort at the beginning of the course and complete all requirements as outlined in the syllabus with that cohort. A letter of intent, submitted to the program director's office is required prior to the end of the withdrawn course, as outlined in the LCCC admission process.

Graduation

LCCC Graduation and Application Process for the NCLEX-RN Exam
At the successful completion of the nursing program students are required to complete an application for graduation. For students who have access to Self-Service, click the graduation overview tab on the home landing page in self-service to apply. As part of the online graduation application, students will have the option to reserve their space in the commencement ceremony and will then be connected to information about ordering their cap and gown for the ceremony. For students who no longer have Self-Service access: please contact the LCCC Student Hub for assistance. Student nurses are encouraged to participate in the LCCC commencement held in May.

Graduates from a state board approved nursing program are eligible to take the National Council Licensure Examination (NCLEX-RN). A passing score must be achieved to earn the title of Registered Nurse. Admission to or completion of the nursing program is not a guarantee of licensure. In Wyoming, the Board of Nursing protects the public by screening candidates for licensure in order to identify potentially unsafe nurses. The law provides for denial of licensure for acts that are substantially related to nursing qualifications, duties, or abilities. http://nursing.wy.us

Personal College Records
Student are responsible for maintaining an updated address and phone number at both student records and the nursing office. Student records are kept electronically on the Laramie County Community College server and in document storage system. Contact information and course progression paperwork is kept in a locked cabinet in the nursing office. Only appropriate personnel and the student have access to the file. All records are retained according to the Wyoming Community College Retention Schedule. At any time, the student may review the information found in the file by contacting the program director of nursing. Students wishing information to be sent to other parties must make such requests in writing. When work or school references are requested, information is supplied from the files as well as from the faculty. In these instances, general summary statements are usually requested. No copies of course grades are sent. Official transcripts from LCCC may be obtained by contacting student records when needed.

Application process for RN Licensure

1. Complete the LCCC graduation application. <u>Even if you don't plan to attend the commencement ceremony</u>. The completed graduation application must be on file with LCCC so your transcript will reflect you graduated from an ADN program.
2. Request transcripts to be sent to the nursing regulatory body where you wish to be licensed/registered (Ex. Wyoming State Board of Nursing, WSBN). Note: on the transcript form there is an option to check for the transcripts to be sent **AFTER degree is posted/awarded by the registrar's office**. Otherwise, the transcript is immediately sent out and will not show you completed the nursing program.
3. Apply for licensure/registration at the nursing regulatory body where you wish to be licensed/registered (Ex. Wyoming State Board of Nursing, WSBN link https://wybn.boardsofnursing.org/wybn#
4. Complete fingerprinting requirements as directed by the nursing regulatory body where you wish to be licensed.
5. After final grades are posted, the registrar's office will send the requested transcripts to the selected nursing regulatory body. **This process can take several weeks** for the licensure/registration to the nursing regulatory body to receive the transcripts.
6. Once the regulatory body (for example WSBN) receives the transcripts, the transcripts are matched to the application you submitted.
7. The regulatory body will then notify Pearson VUE that you are eligible to test. Once Pearson VUE has received notification from the regulatory body that you are eligible to test, you can register for the NCLEX-RN with Pearson VUE by internet or telephone. You will need a program code (LCCC RN-ADN code is **US88405700**) to register, and an email address must be provided with your registration. Correspondence from Pearson VUE will only be available via email.

Pinning Ceremony

Students who have met all of the graduation requirements are <u>required to participate in the pinning ceremony</u> (including the practice session) held for their class, either May or December. The pinning ceremony typically follows the last day of the semester (adjusts according to LCCC calendar).

- **Venue:**
  - May graduating classes: pinning will be held where graduation is to be held, usually at the Surbrugg Prentice Auditorium (SPA). LCCC provides the venue free of charge to nursing students.
  - December graduating classes: pinning will be held at the Surbrugg Prentice Auditorium (SPA). LCCC provides the venue free of charge to nursing students.
  - **Speakers**:
    - Students will nominate speakers and the class will vote. The speaker will be approved by the pinning committee and the nursing program director. The selected speaker will then be notified by the pinning committee.
- **Invitations**:
  - The pinning committee will disperse invitations electronically to students who can share/print as desired.
  - Additional electronic invitations shall be sent from the Program Director's office, one month in advance, to:
    - College President
    - College Vice Presidents
    - College Board of Trustees
    - College Deans
    - All Nursing Faculty, including adjunct faculty
    - Nursing Program Advisory Board
    - School of Health Science and Wellness Staff
    - Key advisory boards members such as the chairperson
    - Clinical Partners
    - Wyoming State Board of Nursing Officers
- **Programs**:
  - The pinning committee will update the Nursing Program and order from LCCC Printing 6 weeks in advance.
- **Dress Code:**
  - Graduates will wear their dark grey LCCC Nursing uniform as is required for class photo. Uniforms are to be clean and neat, free of wrinkles, odors, rips/tears. Black shoes, black socks and undershirts are permitted as is outlined in the dress code. No additional adornments are allowed during pinning such as stethoscopes, name tags, regalia items, etc. The only exception is made for SNA leadership cords.

- **Expenditures:**
  - All purchases will be on an approved by pinning faculty PRIOR to purchase signed for by Program Director of nursing, unless otherwise directed by LCCC staff/faculty.

Part 4: Clinical Expectations Policies & Procedures

Clinical Rotation Site Expectations and Assignments

LCCC nursing program works diligently to ensure that each clinical rotation meets the learning outcomes required by the course as well as our accrediting bodies. To ensure this process is successful, a tremendous amount of time and thought are put into scheduling all learning experiences. Students complete two-hundred and twenty-five (225) contact hours of clinical learning experiences per semester to meet the outcomes of the course and the nursing program. As a result, changes to the schedule, groups, rotation assignments are not permitted. Clinical rotations occur in all four semesters. Students are assigned to clinical sites based upon a variety of factors that include but are not limited to: accreditation requirements, faculty/preceptor availability, clinical site availability, family members and/or couples are typically placed in different clinical groups, and recommendation from previous semester course instructors. The Clinical Coordinator will make clinical rotation assignments and post them in the Canvas clinical course prior to beginning the clinical course. Students are responsible for childcare arrangements, work schedules, transportation, and lodging arrangements. Accommodations are not made for students personal or professional schedules. Students may be required to rotate between morning, evening, and night clinical experiences. Students are expected to attend the clinical site experiences as assigned. It is the student's responsibility to check Canvas for clinical assignments.

Clinical Evaluation
The clinical standards of the nursing program promote the attitudes, work ethic, communication, skills, and manual dexterity of an entry level nurse. Depending on the clinical course, students may be evaluated daily, at mid-term and/or at the end of the clinical rotation. In the event of an unsatisfactory grade, as defined as less than 75% average on the clinical evaluation tool, students may be required to rework the unsatisfactory assignment or complete an additional assignment. Copies of evaluations are maintained as assignments in the Canvas course shell. Students not meeting learning outcomes may be required to meet with the faculty and/or program director to develop a PIP.

Clinical Experiences
The nursing program provides a variety of clinical experiences (off site facilities, onsite nursing labs – skills and simulation, and virtual clinicals) for students to develop clinical judgment and nursing skills needed to provide safe patient care. The off-site clinical experiences provide students the experience in direct patient care. The simulation lab is a safe place to test theories and experiment with concepts while providing students a place to apply clinical judgement and nursing skills in a safe and meaningful environment. The nursing skills lab is designed to provide students a safe place to learn essential nursing skills and apply clinical judgment. The virtual clinical experiences provide the opportunity for students to interact with virtual patients. In this setting students can practice essential nursing skills and apply clinical judgment in a safe environment.

Clinical Expectations
Students are required to abide by the professional behaviors and code of conduct for the nursing program as well as the following expectations in the clinical area. Students who do not adhere to these expectations may be required to leave the clinical area.

Expectations for ALL clinical experiences (off site facility, nursing labs - skills and simulation):
- The approved clinical uniform, scrub jacket and/or lab coat, approved SNA jacket including the identifying name badge must always be worn at the clinical experiences.
- Students will present to clinical rotations clean and absent of offending odors following ALL guidelines outlined in the dress code policy.
- No tobacco products, e-cigarettes, or smoking or use of e-cigarettes is permitted during the entire clinical experience including break times.
- Personal phone calls or visits should be of an emergency nature only. Non-emergency phone calls or visits should be arranged at student's break time. Breaks are scheduled with the clinical faculty.
- The use of drugs other than those prescribed by a physician to treat a specific condition is forbidden. If a student is taking prescribed medication that may cause impaired functioning, this should be discussed with the clinical faculty. The consumption of alcoholic beverages prior to attendance in either the clinical or classroom areas is expressly forbidden.
- If the faculty determines the student's ability to function safely in the clinical area is impaired (for any reason), the student is expected to immediately leave the clinical site. If alcohol or drugs are suspected, the student will be escorted for an immediate drug screen at their expense according to the impaired student policy. The faculty will document the incident and report it to the program director. A copy of the incident, reporting the violation, will be placed in the student's file.

Expectations specific to off-site clinical experiences:
- Students must be able to meet the physical/mental/social requirements of the clinical rotation at all times.
- Students will abide by all facility policies.
- Students will care for all assigned patients regardless of diagnosis at the discretion of the faculty.

- Students are expected to remain at the clinical site for the duration of the scheduled experience (i.e. cannot leave the facility during scheduled breaks or lunch).
- Cell phones are prohibited in any direct patient care areas, such as patient rooms, dining rooms or therapy settings. Cell phones, PDAs or similar devices will be allowed as a reference in the clinical setting but will not replace clinical preparation. However, facility policy may differ, and students are expected to adhere to restrictions during clinical.
- Do not use any forms of patient identification in written assignments. All oral and written reports of a patient are confidential. Information concerning patients is only to be used to further nursing education and only discussed with responsible staff and faculty and in clinical conferences. Casual or unintentional dispersal of confidentiality will result in disciplinary action. (See Professional Conduct)
- Students are responsible for seeking the assistance of the faculty in the clinical area before proceeding with new, unfamiliar, or uncertain aspects of patient care.
- Students must report all patient assessment data out of the normal range to their faculty and appropriate staff member, immediately.

Expectations for Safe Clinical Practice

Unsafe clinical practice is behavior that places the patient or other individual in either physical or emotional jeopardy. Physical jeopardy is the risk of causing harm. Emotional jeopardy means that the student creates an environment of anxiety or distress which places the patient or others at risk. Students demonstrating unsafe behavior will be asked to leave the clinical experience. The student will comply with faculty direction without incident.

During any clinical rotation, students MAY NOT perform any nursing procedure or administer any medication or treatment without express permission from their clinical faculty and with successful completion of all required skill return demonstrations (see return demonstration policy). It is the responsibility of the student to understand expectations for performance and patient interaction during the rotation and remain within the lines of these expectations at all times. Failure to do so may result in disciplinary action up to and including dismissal from the nursing program.

Exception: ONLY during the 4th semester during preceptorship rotation, this clarification of expectations and permission will be issued from the student's assigned preceptor.

Students sent home from clinical for unsafe behaviors, may fail the rotation and/or the course which could result in dismissal from the program. If critical behavior resulted from lack of skill, the student may be required to demonstrate competency in the campus nursing skills lab before being allowed to return to clinical. Other safety infractions may result in course failure and/or dismissal from the program.

Safety protocols (off site facility, nursing labs - skills and simulation):
- Use standard precautions at all times.
- Students are responsible to locate the nearest fire alarm and fire exit.
- In the case of an injury, notify the faculty immediately.
- Emergency first aid needed for illness or injury that occurred during any clinical experience will be given. The student is personally responsible for the payment for such care provided.
- Accidents, illnesses, and injuries must be reported immediately to the faculty and a facility and/or LCCC incident report may be required.
- For any exposure to bodily fluids, the student will report the exposure to the clinical faculty and meet the requirements of the facility's Blood and Body Fluid Exposure Policy or Procedure.
- Proper body mechanics, transfer techniques and wheelchair safety will be followed at all times.
- Observe electrical safety at all times. If a problem is discovered, notify the faculty. Do not fix the problem.
- Dispose of sharps in an impervious sharps container provided.
- If a student has a suspected/documented latex or other allergies, it is incumbent on the student to notify the course faculty immediately.

Safety protocols specific for nursing labs - skills and simulation:
- Student may not use the nursing labs - skills or simulation without a faculty present.
- Do not practice invasive skills on other students or living beings.
- MSDS can be accessed electronically on the website at www.lccc.wy.edu under About, Physical Plant, and then MSDS online and MyLCCC.wy.edu
- No food or drink in the simulation lab. Food and drinks are permitted in the debriefing room.

Incident Report

In the event that a reportable incident occurs a copy of this incident report will be filed with the Laramie County Community College Nursing Office. Forms are available online in the Canvas course shells. Students will be directed by their clinical faculty for form submission. Incident reports are expected to be submitted to the nursing office within 48 hours of occurrence.

Essential Clinical Behaviors

Critical behaviors identified by faculty which may result in the student being dismissed from clinical:

- Failure to adequately prepare for clinical/simulation.
- Failure to identify resident/patient prior to procedures.
- Failure to cleanse hands prior to resident contact, prior to procedures, and/or after resident contact.
- Failure to wear PPE when appropriate.
- Failure to function within parameters of facility policies/procedures.
- Failure to follow faculty direction or achieve appropriate permission to perform any nursing procedure or administer any medication or treatment.
- Failure to adhere to the six rights of medication administration.
- Any violation related to patient safety, confidentiality or personal safety.
- Failure to maintain immunizations such as flu vaccine and annual Tb test.

Dress Code

Dress code expectations follow nursing program, HSW, LCCC, and clinical partner expectations. These expectations are to be followed by students at all times (i.e. clinical experiences, nursing program activities, events where students are representing LCCC) not only representatives of nursing, HSW, and LCCC but also future professional Registered Nurses joining a highly regarded profession. Students found to be out of compliance with nursing program dress code will be excused from experiences (including all clinical experiences such as lab, sim, alternative experiences, preceptorship, nursing program activities, and others). Excused students will receive a zero for the day and may be required to meet with clinical faculty and/or program director to address professionalism and student conduct issues. Failure to comply with dress code expectations may result in further disciplinary action up to and including dismissal from the nursing program.

Uniforms/Name Badge

- The approved clinical uniform includes approved scrub jacket and/or lab coat, identifying name badge which is worn at the shoulder or lapel of lab jacket (not the waistband of scrub pants) all times during the clinical experience, solid black shoes and solid black socks, and required equipment as outlined below.
  - Approved dark grey uniforms must be clean, neat, wrinkle free, well fitting, free of odors/rips/tears. Variation in pant/scrub top style is not permitted without written approval from the program director.
  - If a skirt uniform is worn, the length must be past the bend of knee, match the color of the uniform pants, and full-length black stockings must be worn.
  - No bare midriff or visible cleavage shall be evident. Solid black undershirts are permitted.
  - Solid black stocking/socks only.
  - SNA black jacket purchased through the LCCC bookstore may be worn with clinical uniform.
  - Appropriate facial coverings.
    - In clinical experiences at partner facilities students are expected to follow clinical partner policy and procedure. Failure to do so will result in students being excused from the experience and subject to ramifications outlined previously.

Shoes

- Solid black color, closed toe without holes on top of shoes.
- No color stripes, white soles, or color logos are permitted.
- **Unacceptable** shoes include: open toe shoes, sport sandals, crocs, high heels, shoes with open heel, dirty shoes, shoes with alternate color logos/laces.

Equipment

Required for all clinical experiences:

- Stethoscope
- Watch with a second hand and does not interfere with hand hygiene.
- LCCC and facility Name badge – **SMALL** badge reels are permitted.
- Black ink pen
- Bandage Scissors
- Penlight

*No borrowing equipment from fellow students during clinical experiences.

*Stickers/emblems/decals on computers, water bottles, backpacks MUST be conservative and minimal in nature. Offensive material will not be tolerated and will result in equipment being removed from the clinical site.

Undergarments

- For charcoal grey uniforms: Acceptable undershirt is a long or short sleeve solid black t-shirt (no emblems/logos).
- Undergarments must be black and must be unobtrusive and not visible. No bright, noticeable, or alternate color logos.
- No bare midriff or visible cleavage.
- No undershirts that are lacy, made of Spandex, gauze, or sheer.
- No Sleeveless, spaghetti straps, backless, low-cut or tight fighting undergarments.

Hygiene

- Students are expected to role model good hygiene.
- Students are required to shower/bathe and use deodorant prior to the clinical.
- No visibly dirty unwashed hair or body.
- No strong body odor or perfume.

Cosmetics/Scents

- Makeup, if worn, is to be used in moderation.
- No perfumes/colognes, scented lotions, or scented hair sprays.
- No odors of tobacco, vape, or other substance (if noted student will be sent home and may be subject to drug testing – see drug testing policy for additional guidance).

Fingernails

- Fingernails: clean, trimmed, no more than 1/4" beyond fingertips
- Fingernail polish: clear polish is permitted but must be in good repair.
- No Artificial nails or gel/dip covering, No designs, gems, nail jewelry.

Jewelry

- Jewelry must not jeopardize or interfere with patient safety and must be discreetly worn.
- Earrings: one non-dangling earring per ear lobe. All other earrings must be flesh or clear in color.
  - Medical piercings (i.e. daith piercings) must be approved by clinical faculty and/or program director prior to clinical.
- Ear gauges: (enlarging device for the earlobe) smaller than ¼ inch in diameter.
- Facial Jewelry: not allowed. Example: visible piercings (nose, lip, eyebrow, etc.).
  - Plugs for piercings should be flesh colored or clear.
- Bracelets: not allowed
  - exception medical alert and for religious purposes. Must be approved by clinical faculty and/or program director.
- Rings: no rings with large stones. Minimal rings such as a wedding band are allowed as long as they do not interfere with gloving and hand hygiene. Must be approved by clinical faculty and/or program director.
- Necklaces: not allowed at any length, no dangling jewelry.
  - exception medical alert and for religious purposes. Must be approved by clinical faculty and/or program director.

Hair
- Hair must be of a naturally occurring color, clean, neat, and contained.
- Hair longer than shoulder length must be worn up or pulled back in a professional and neat manner.
- Approved Head bands: must be solid black, or match hair color and not exceed one inch in width.
- No hair style that obstructs vision, bangs secured, loose ends contained.
- No brightly colored hair allowed (i.e. orange, purple, feathers, adornments, and unnaturally occurring hair colors).

Facial hair
- Facial hair should not extend ½ inch beyond the chin and should be clean, neat, and trimmed.
- Facial hair may be required to be trimmed if a tight seal for PPE use is impaired.

Tattoos
- Tattoos depicting violence, profanity and nudity must be covered.
- The faculty has the authority to determine which tattoos need to be covered.
- No facial tattoos.

Tobacco
- No smelling like cigarette or e-cigarette vape odors.
- No chewing tobacco. (if noted student will be sent home and may be subject to drug testing – see drug testing policy for additional guidance).

Gum/Candy
- No eating in patient care areas.
- No gum chewing in patient care areas.

Exceptions can be made for religious and medical reasons by written request to program director.

Part 5: Forms

Performance Improvement Plan (Conduct Violation)

Performance Improvement Plan (Conduct Violation)

_____, in order to progress in the Nursing Program at LCCC, you must meet not only academic expectations but also conduct requirements as outlined in the LCCC, HSW and Nursing Program Handbooks. These requirements for the Nursing Program as well as other Health Science and Wellness Program activities include but are not limited to, professionalism and personal responsibility. When these expectations are not met, students are not able to progress in the Nursing Program. Students must comply with **all** nursing program, HSW, and LCCC policies. Currently you are not in compliance with the following LCCC, HSW, and/or Nursing Program Policies:

Specific Area(s) of Concern:
_____Academic Standing
_____Safety   _____Patient Centeredness   _____Clinical Judgment
_____Leadership   _____Professionalism   _____Health Promotion
Brief description of area of concern:

Desired outcome:

Plan for improvement:

Re-evaluation time frame and expectations:

Failure to meet goals for improvement by designated reevaluation period will result in additional disciplinary action up to and including dismissal from the nursing program.

_____   Date:_____
Student printed name and signature
-or-
(email confirmation of receipt *attached*)   Date:_____

_____   Date:_____
Faculty/Program Director printed name and signature

A Copy of the Performance Improvement Plan is being sent to the student through email in place of signatures. Required response to this emailed document will count as acknowledgement that the Performance Improvement Plan has been received and is in effect.

Academic Performance Improvement Plan

For use in NURS1100, NURS 1200, and NURS 2300

_____(student name),

As faculty of the LCCC Nursing Program, we want to help you be successful. Part of that process is ensuring we communicate when minimum expectations have not been met. As written in the Nursing Program Student Handbook. In order to progress in the nursing program, students "must achieve at least at least a 75% average weighted grade for all unit and final exams". The nursing faculty are committed to all student's success and are available to help when students are struggling. However, we cannot do it for you. It is your responsibility to request assistance, schedule meeting with your instructors during office hours, participate in exam review sessions, etcetera. In addition to working with your nursing faculty, additional resources are also available for your success.

Grading Policy: The nursing program adheres to LCCC's expectations for grades. Grades earned in the nursing program are clearly communicated through the course syllabi and the nursing program student's handbook and are not arbitrary.

4 Unit Exams & Final Exam	80% of final grade
ATI	10% of final grade
Assignments (Homework & Class Activities): **Students must achieve an average of 75% on all exams before these grades are added to the final grade in the class.	10% of final grade

Performance Improvement Plan Policy: A PIP is a written warning identifying either a pattern of unsatisfactory conduct or a single violation of the nursing program student handbook, HSW, LCCC, or clinical facility policies. Students are required to meet with faculty and/or program director to discuss identified unsatisfactory conduct and collaboratively develop a PIP to correct identified area(s) of concern.

Expectations: In order to satisfy the Academic PIP, you are expected to:

- Meet with faculty after every unit exam
- Make at least one (preferable more than one) office appointment with faculty in addition to reviewing each exam.

This PIP plan will remain in effect for the remainder of the semester *(longer if needed)*.

Please note: PIP conditions must be met in order for students to be eligible to petition to retake a semester, the student must meet all the expectations outlined in the PIP.

Performance Improvement Plan (PIP)

Specific Area(s) of Concern:

_X_ Academic Standing

Brief Description of area of concern:

Student Name: _____	Percentage for Exam Scores		Exam Reviews completed (*Dates & Instructor Initials*)	Missing Assignments	Absence/Tardies
Course: NURS_____	Exam 1:	*%*			
	Exam 2:	*%*			
Term: _____	Exam 3:	*%*			
	Exam 4:	*%*			
	Final Exam:	*%*			
	Exam Average grade:	*%*			
	Overall Course Grade:	*%*			
Exam Reviews:					
Clinical Grade:					
End of PIP review: Goals Met? Yes ☐ No ☐ ***If No: Please attach plan for continued improvement*** (*Date & Instructor Initials*): _____					

Desired outcome:

- Achieve at least a 75% average for all exams in nursing course
- Using the grade calculator (https://www.rapidtables.com/calc/grade/grade-calculator.html) set a goal for each remaining quiz and final exam to achieve at least at 75% average for all unit exams and final (refer to the course syllabus for weighted grade percent's)

Plan for improvement: Students are expected to complete columns 3 and 4 each week. During exam reviews, faculty will ask student to share progress on SMART Goals. *May be completed using the Weekly Plan for Improvement Form.*

Identified Problem Areas	SMART Goals for Addressing Problem areas	Weekly plan to meet goals	Comments on weekly goals:	Instructor Initials & Date of Review

Failure to meet goals for improvement by designated reevaluation period may result in additional disciplinary action up to and including dismissal from the nursing program.

Failed Exam Letter

Greetings_____,

As faculty of the LCCC Nursing Program, we want to help you be successful. Part of that process is ensuring we communicate when minimum expectations have not been met. As written in the Nursing Program Student Handbook (p. 50-55) In order to progress in the nursing program, students "must achieve at least at least a 75% average weighted grade for all unit and final exams". Currently your average exam score is _____% and does not meet this expectation. It is important to identify factors that may have negatively impacted your exam performance. Factors that typically affect student success include study habits, work schedules, and time management. We recommend that students reflect on factors contributing to less-than satisfactory performance and develop a plan for success.

The nursing faculty are committed to all student's success and are available to help when students are struggling. However, we cannot do it for you. It is your responsibility to request assistance, schedule meeting with your instructors during office hours, participate in exam review sessions, etcetera. In addition to working with your nursing faculty, additional resources are also available for your success. We strongly encourage you to utilize these resources to increase your exam performance and to become a knowledgeable and safe nurse. Below is a list of the recommended resources:

- Schedule an exam review with nursing instructor
- Join SNA peer mentoring program
- Schedule nursing tutoring sessions with the learning commons at https://www.lccc.wy.edu/academics/services/learningCommons/index.aspx
- Learning commons tutors are available to help with:
- Nursing content
- How to take multiple choice exams
- Study skills
- Time management
- Test anxiety
- Onsite and online tutoring available from 0900-2000 7 days week
- Live tutoring is available Monday through Wednesday as scheduled
- Review page 45-46 of the nursing program student handbook for additional tips

All of the nursing faculty desire to see you to succeed and become a registered nurse. This process may pose a greater challenge for some individuals than it is for others. We sincerely hope that utilizing these resources and implementing necessary changes will lead to success in all future exams.

If you fail a second exam or have a failing grade in the nursing course overall, you will meet with your faculty and/or the program director to initiate a performance improvement plan (PIP). A performance improvement plan is your contract for success for the remainder of the semester. As a reminder, the nursing program requires that students average at least 75% on exams to pass the course. This average must be achieved before the grades for the remaining categories are added to the final grade.

Please take the time to reach out to your nursing faculty and the Learning Commons for additional support.

Thank you,

LCCC Nursing Faculty

Patient Simulation Lab Confidentiality Statement

Laramie County Community College supports the LCCC Nursing Program's Professional Conduct/Confidentiality Statement found in the Nursing Program Student Handbook. This policy is binding to all users of the Simulation Lab.

Students are expected to keep all events, procedures, and information used in conjunction with the Simulation Lab strictly confidential. This includes patient history information obtained prior to the actual simulation experience, as well as information obtained and used in the pre- and post-conferences. Please, note: This includes information about the simulation as well as information about your performance and your peer's performance.

Students are not to share information about their simulation experience with other students, so everyone gets an equal opportunity for learning.

Violation of this confidentiality statement is a violation of the LCCC Nursing Program's Professional Conduct/Confidentiality Statement and will lead to consequences for the student, possibly up to and including removal from the nursing program.

I, _____, have read the statement above and understand it.

Re-Admission Application Form

Name of student:
Course(s) you are requesting to re-take

Instructions: Answer all questions in an essay format. Use at least 3 sentences for each question. Use full sentences and correct grammar and spelling.

1. Identify at least three strengths that will help you succeed academically in the nursing program.

2. Explain how these strengths will help you succeed academically in the nursing program.

3. Identify at least 3 areas that contributed to your unsuccessful academic performance.

4. Describe how these areas contributed to your poor academic performance and actions you will take to improve your academic performance.

5. If you are chosen to continue in the nursing program, identify the resources you will utilize and how they will improve your academic performance? (Identify at least 3 resources you will use).

6. Write 3 SMART goals for improving your academic performance.

7. Develop a comprehensive plan for improving academic performance by incorporating answers to questions 4, 5 and 6.

I understand that I may reenter the program once, though no guarantee of readmission is given. Faculty members reserve the right to deny readmission based on a number of factors, including and not limited to prior clinical and theory performance, professional behaviors, interim remedial work completed by the student.

EXHIBIT "A"

Student Confidentiality & Responsibility Statement

The undersigned hereby acknowledges his/her responsibility under applicable Federal law (HIPAA and FERPA) and the Agreement between Laramie County Community College (*LCCC*) and the respective clinical facility to keep confidential any information regarding facility patients. The undersigned agrees, under penalty of law, not to reveal or disclose to any person or persons except authorized clinical staff and associated personnel any specific information regarding any patient and further agrees not to reveal or disclose to any third party any confidential information of the respective clinical facility, except as required by law or as authorized via written instrument by same.

During the term of this Agreement, undersigned may have access to and become acquainted with confidential information and trade secrets of a facility, including information and data relating to contracts and accounts, clients, patients, patient groups, billing practices and procedures, business techniques and methods, strategic plans, operations and related data. All trade secrets are the property of the respective facility and used in the course of their business, and shall be proprietary information protected under the applicable law. The undersigned shall not reveal or disclose to any person or entity, directly or indirectly, at any time, any trade secrets, or use any trade secrets other than in the course of the undersigned's clinical learning experience at the designated clinical facility. All documents prepared by the undersigned, or trade secrets that might be given to undersigned in the course of the clinical training experience are the exclusive property of the respective clinical facility, and, without the prior written consent of the respective facility, shall not be removed from the premises.

For and in consideration of the benefit provided to me in the form of experience in the evaluation and treatment of patients through a "clinical learning experience", I agree to assume the risks and to be solely responsible for any injury or loss I sustain while participating in the Program operated by Laramie County Community College (*LCCC*) at each designated training facility (or facilities) except to the extent such injury or loss is due to the negligence or willful misconduct of others during the clinical experience. While participating in the clinical program, the students:

A.   Shall not drive or operate any Provider vehicle or apparatus; and,

B.   Shall not directly perform or provide any direct emergency medical assistance or services to any person, but may assist Provider personnel in the rendering of such services; and,

C.   Shall be under the direct supervision and control of the Provider; and,

D.   Shall perform only tasks and duties assigned by Provider; and,

E.   Shall wear all appropriate safety gear and equipment as directed by Provider; and,

F.   Shall conform to all policies & procedures, safety rules, directives, and regulations of the Provider, and all local, state and federal laws and regulations; and,

G.   Shall not receive any compensation for services rendered during the performance of this clinical experience.

VOLUNTARY ASSUMPTION OF RISK AND RELEASE OF LIABILITY
LARAMIE COUNTY COMMUNITY COLLEGE ALLIED HEALTH PROGRAMS

THIS IS A RELEASE OF LEGAL RIGHTS. READ AND UNDERSTAND IT BEFORE SIGNING. Laramie County Community College (LCCC) is a non-profit educational institution. References to LCCC include its officers, officials, employees, volunteers, students, agents, and assigns. I (print your name) _____. freely choose to participate in the LCCC Allied Health Program _____ (specify program). In consideration of my voluntary participation in this Program, I agree as follows:

RISKS INVOLVED IN PROGRAM: I understand that the clinical training environment for the Program in which I am enrolled through LCCC contains exposures to risks inherent in activities of the Program such as but not limited to: Physical lifting of patients or assisting with movement of patients; Standing for several hours at a time; Bending activities; Contact with communicable and infectious disease; Undertaking of responsibilities and duties impacting patient lives which could cause mental or emotional stress; Property damage: (Specify any potential risks of the individual clinical site)

HEALTH AND SAFETY: I have been advised to consult with a health care provider (M.D., D.O., N.P., P.A.) regarding my personal medical needs. I state that there are no health-related reasons or problems that preclude or restrict my participation in this Program. I have obtained the required immunizations. I recognize that LCCC is not obligated to attend to any of my medical or medication needs, and I assume all risk and responsibility therefore. In case of a medical emergency occurring during my participation in this Program, I authorize in advance the representative of LCCC to secure emergency treatment if necessary. LCCC may (but is not obligated to) take any actions it considers to be warranted under the circumstances regarding my health and safety. I agree to pay all expenses relating thereto and release LCCC from any liability for any actions.

ASSUMPTION OF RISK AND RELEASE OF LIABILITY: Knowing the risks described above, and in voluntary consideration of being permitted to participate in the Program, I hereby knowingly assume all risks inherent in this activity and connected activities. I agree to release, indemnify, and defend LCCC and their officials, officers, employees, agents, and volunteers from and against any and all claims, of whatsoever kind or nature, which I, the participant, my parents or legal guardian or any other person may have for any losses, damages or injuries arising out of or in connection with my participation in this Program.

INDEPENDENT ACTIVITY: I understand that LCCC is not responsible for any loss or damage I may suffer when I am doing Program activities and that LCCC cannot and does not guarantee my personal safety. In addition, I specifically acknowledge that in performing Program activities, I am doing so independently in the status of a student of the Program I choose, and not as an employee or agent of LCCC. I further waive any and all claims which may arise from such Program activities, acknowledge that workers' compensation benefits are not provided to me in my capacity as a student, and hold LCCC harmless from any of my negligent acts. I further state that I am not in any way an employee of LCCC in any capacity. I further agree that I am solely responsible for my own equipment, supplies, personal property, and effects during the course of Program activities.

In addition, I agree that if I drive or provide my own motor vehicle for transportation to, during, or from the Program site I am responsible for my own acts and for safety and security of my own vehicle. I accept full responsibility for the liability of myself and my passengers, and I understand that if I am a passenger in such a private vehicle, LCCC is not in any way responsible for the safety of such transportation and that LCCC's insurance does not cover any damage or injury suffered in the course of traveling in such a vehicle.

SIGNATURE: I indicate that by my signature below that I have read the terms and conditions of participation in this Program and agree to abide by them. I have carefully read this Voluntary Assumption of Risk and Release of Liability and acknowledge that I understand it. No representation, statements, or inducements, oral or written, apart from the foregoing written statement, have been made. This Voluntary Assumption of Risk and Release of Liability shall be governed by the laws of the State of Wyoming that shall be the forum for any lawsuits filed under or incident to this Form or to the Program. If any portion of this Form is held invalid, the rest of the document shall continue in full force and effect.

CONSENT FOR RELEASE OF INFORMATION
LARAMIE COUNTY COMMUNITY COLLEGE

I (print name) _____ give permission for the Nursing faculty and/or program to share personal information about me including name, student identification number, date of birth and verification that the Program has evidence that I have met all the health and safety requirements of the Nursing Program. This information will be provided to clinical agencies where I am assigned so that I may complete mandated pre-clinical education requirements, obtain entry into the agency's computer system and/or medication administration system, and complete duties necessary in the actual clinical rotations.

I (print name) _____ give my consent to have photographs taken and data collected of me to be used for recruitment, educational, and/or research purposes in the nursing program.

This authorization will remain in effect until my Nursing Program clinical experiences are completed or until revoked. I understand that signing this consent is voluntary, and that revoking the consent prior to a clinical experience may have impact on my ability to be assigned to a clinical agency. A revocation of this consent must be in writing and be delivered to the program director of nursing. I also understand that information disclosed under this authorization might be redisclosed by the clinical agency and that such disclosure may no longer be protected by federal or state law.

Further, I, _____ hereby authorize Laramie County Community College, ("Institution") including all employees, agents, and other persons professionally affiliated with Institution having information related to the results of my background check and credential check(s) as these terms are generically used by background check agencies, hospitals, clinics and similar medical treatment facilities, to disclose the same to such facilities and the appropriate institutional administrators and faculty providing clinical instruction at such facilities, waiving all legal rights to confidentiality and privacy.

I expressly authorize disclosure of this information, and expressly release Institution, its agents, employees, and representatives from any and all liability in connection with any statement made, documents produced, or information disclosed concerning the same.

I understand that a hospital, clinic, or similar medical treatment facility may exclude me from clinical placement on the basis of a background check. I further understand that if I am excluded from clinical placement, I will not be able to meet course requirements and/or the requirements for graduation. I release Institution and its agents and employees from any and all liability in connection with any exclusion that results from information contained in a background check.

Any hospital, clinic or similar medical treatment facility to which I am assigned may be required by the Joint Commission on Accreditation of Healthcare Organizations' policy to conduct an annual compliance audit of five percent (5%) or a minimum of thirty (30) background investigation files. I agree that, upon request from a hospital, clinic or similar medical treatment facility to which I am assigned, I will provide the results of my background check to be used for audit purposes only.

COMPLIANCE WITH POLICIES

The policies contained in this handbook are specific to students enrolled in the LCCC Nursing Program. The standards are in addition to those prescribed for students under LCCC policies and administrative regulations. Violation of any such standard may serve as grounds for program dismissal, suspension, or other discipline. Every student is expected to know and comply with all current policies, rules, and regulations as printed in the LCCC college catalog, class schedule, college student handbook, course syllabus, and the LCCC Nursing Program Student Handbook.

I have access to the LCCC Nursing Program Policies. I understand this handbook contains information about the guidelines and procedures of the LCCC Nursing Program in which I am enrolled. I also understand that I can find information about the general college policies in the LCCC College Catalog and the LCCC Student Handbook.

By signing this agreement, I certify that I have read and understand the Nursing Program Policies and will comply with them.

ACKNOWLEDGMENT OF LCCC'S SUBSTANCE ABUSE POLICY CONSENT TO TESTING, AND RELEASE OF INFORMATION AND LIABILITY

I,_____, acknowledge that I have seen and reviewed LCCC's Substance Abuse Policy. I understand that pursuant to the policy I may be required to submit a body fluid sample (such as of my urine, blood, saliva, and/or breath) to a collection and laboratory facility, which LCCC selects, for chemical analysis to determine whether performance altering drugs and/or alcohol are present in my system. I further understand that if I fail to pass my test, and/or refuse to abide by all sample collection and chain of custody procedures, I will be subject to disciplinary action as set forth in LCCC's Allied Health Program Policy for Students. I hereby knowingly and voluntarily consent to LCCC's, the laboratory's, and/or collection facility's (or their respective agents) request for my body fluid sample for chemical analysis. I further authorize the laboratory or collection facility (or their agents) to release to LCCC any information regarding the results of any such chemical analysis of my body fluid sample. In exchange for participation in the LCCC Allied Health Program, I also release LCCC, including any and all of its Board of Trustees, the President, Administrators, Deans, and employees, from any and all claims, suits, charges, causes of action, liability, and damages relating to or arising from (a) the submissions of my body fluid sample for chemical analysis; (b) my refusal to submit a sample; (c) the release of any information to LCCC pertaining to the collection, testing, or test results of my sample; and/or (d) the termination of my participation in LCCC's Allied Heath Program based on a positive drug or alcohol test result and/or my refusal to submit to testing. I also understand that this acknowledgment, consent, and release will remain valid, binding, and useable throughout my participation in LCCC's Allied Health Program whenever LCCC requires that I submit to a drug and/or alcohol test when requested in accordance with a for cause drug screen.

LCCC NURSING PROGRAM
CODE OF CONDUCT RESPONSIBILITY AND CIVILITY CONTRACT

This contract is designed to promote a positive learning environment which facilitates learning.

Students have a right to expect:
A syllabus on the first day of class with clearly stated course outcomes, a topic schedule for the semester, a fair grading policy, required textbooks, and attendance policy.
Classes that start and end on time.
Regularly scheduled evaluations.
The opportunity to make an appointment to discuss the course content outside of class with the faculty.
The return of test results, assignments, and care plans with feedback in a timely fashion.
The opportunity to review tests and assignments with faculty.
Knowledge of their progress in the course.
Professional behavior from faculty and staff.

The faculty has the right to expect that students will:
Arrive on time prepared for class and stay for the entire class unless extenuating circumstances interfere.
Inform the faculty of any extenuating circumstances affecting attendance.
Be actively involved in creating a successful course experience.
Ask for clarification or assistance when needed.
Turn in assignments on time.
Observe codes of academic integrity in the completion of all course work.
Share any concerns about the class in a timely fashion according to the program's policy.
Show respect and concern for others by not monopolizing class discussion and staying on the topic.
Follow the chain of command.

Human Rights and Responsibilities
I will listen to others respectfully and not speak while others are talking.
When I disagree with someone, I will critique his or her ideas in a respectful and constructive manner.
I will try to understand other people's behavior and perspectives rather than simply criticizing them.
I will respect other people's desire to learn and not interfere with the learning process.
I will make sure that my cell phone and other electronic devises do not interfere with the teaching/learning or testing processes.
I will follow HIPAA regulations.
