

1P2a: Program-Level Learning Competencies Displayed on LCCC Website for Academic Programs (Agric. Tech.), 2018

The screenshot shows a web browser window with the URL lccc.wy.edu/programs/agribusinessTechnology/curriculum.aspx. The page features the LCCC logo and a navigation menu with links for Future Students, Current Students, Community Programs, Athletics, About LCCC, and myLCCC. The main content area is titled "Curriculum" and includes a disclaimer: "Material on this page reflects the most recent college catalog. The college reserves the right to make changes in catalog information when necessary and to correct errors." Below this, the program is identified as an "Associate of Applied Science" with a "First Year" and "Second Year" breakdown. Each year is divided into "First Semester" and "Second Semester" sections, each with a "+" icon. A "Total Credits: 62" section is also present. A note states: "*This course has at least one prerequisite. Check the Course Descriptions section of the catalog to see the course prerequisites." Another note reads: "If the placement test score is not adequate for course enrollment, students must complete the appropriate developmental course(s) before enrolling. These courses may increase the total number of program credits. Students should review their math and writing placement with their advisor before planning out their full program schedules." The "Learning Competencies" section lists four items: 1. Analyze management problems in agriculture; 2. Use collaboration on an interdisciplinary level; 3. Practice accessing, evaluating, and combining resources; 4. Demonstrate effective verbal communication. A sidebar on the right contains a menu with options like "Agriculture Overview", "Agribusiness Technology", "Curriculum", "Academic Programs List", "Transfer Agreements with Four-Year Institutions: Articulations", and "Catalog & Class Schedule". The browser's address bar shows the URL, and the Windows taskbar at the bottom displays the search bar, system tray, and the date/time (3:04 PM, 10/7/2018).

Curriculum

Material on this page reflects the most recent college catalog. The college reserves the right to make changes in catalog information when necessary and to correct errors.

Associate of Applied Science

First Year

First Semester	+
Second Semester	+

Second Year

First Semester	+
Second Semester	+

Total Credits: 62

*This course has at least one prerequisite. Check the Course Descriptions section of the catalog to see the course prerequisites.

If the placement test score is not adequate for course enrollment, students must complete the appropriate developmental course(s) before enrolling. These courses may increase the total number of program credits. Students should review their math and writing placement with their advisor before planning out their full program schedules.

Learning Competencies

1. Analyze management problems in agriculture; then evaluate and apply various tools to problem solve solutions and reflect on outcomes and effectiveness.
2. Use collaboration on an interdisciplinary level, foster teamwork, and work toward solutions in agriculture.
3. Practice accessing, evaluating, and combining appropriate resources to foster decision making in an agriculture setting.
4. Demonstrate effective verbal communication both in informal and formal settings by identifying and presenting to agriculture audiences.
