#### Feedback/Data Systems to Identify and Gather Evidence of Student Learning

**Standards:**  
Programs develop feedback/data systems to regularly identify and gather evidence pertaining to program-level student learning competencies.

- Guidelines:
- a) Provide a list of the program's student learning competencies (also in Section One of the review.)
  - b) Provide evidence demonstrating the program has identified, and used or developed a feedback/data system that produces information about student proficiency on program learning competencies.  
[See the Characteristics of Student Learning Feedback Systems in the note below these guidelines.](#)
  - c) Include a recent sample of student learning data generated by the program's feedback system(s).

**Note:** For a description of feedback systems click on the following link-- [Characteristics of Student Learning Feedback Systems](#)

\*Upload supporting documentation or evidence as applicable.

**Judgment**  
 Compliant  Non-Compliant  Not Applicable

- Program Self-Study Narrative**
- a) Provide a list of the program's student learning competencies (also in Section One of the review.)
  - b) Provide evidence demonstrating the program has identified, and used or developed a feedback/data system that produces information about student proficiency on program learning competencies.
  - c) Include a recent sample of student learning data generated by the program's feedback system(s).
