

SimplySNAP MAC Address Tracking Worksheet

Proper recording of each device's MAC address is the most essential step in the installation process.

Instructions: Every device being installed has three decals containing a MAC address. After installing a device you need to:

- 1) Write down a "Blueprint ID" number on the site drawing next to the fixture.
- 2) Place one of the three decals on the drawing next to the fixture,
- 3) Place one of the decals on the space besides that number on this worksheet
(If you lost a decal you can write the MAC address in the box.)
- 4) Place the last decal in a visible location on the light fixture.
