

Community College Library Funding
Reviewed and Approved June 12, 2006

Goal

Meet the information and curricular needs of our students and expand their access to knowledge by purchasing high quality library resources and making them available to community college students using the best delivery systems available.

Objectives

1. Resources purchased will be of direct benefit to students.
2. Cooperative/collaborative purchases will be made by the group when that method is economically advantageous. Group purchases may draw together some or all of the community college libraries and the University of Wyoming Libraries when feasible.
3. Local purchases will update resources and support new, existing and distance programs.
4. Some funds will be used to develop collaborative information literacy tutorials and assessment tools.
